**Additional Information / Prior Funding History:**

FY2006 - \$12,300,000

**Project Description/Justification:**

The Pilot Station Airport Master Plan recommends relocating this airport to a nearby ridge that is aligned favorably with the wind, is situated on excellent material, does not have any obstructions and is more than 10,000 feet from the planned landfill relocation. The existing runway is narrow, less than 3,000' long and has severe crosswinds that both pilots and especially the community, feel very strongly is a safety hazard as supported by numerous stories of trouble with landings. The Yukon Kuskokwim Transportation plan recommends that this runway be 4,000' in length to accommodate existing and future air traffic.
