Additional Information / Prior Funding History:

None.

Project Description/Justification:

Portions of the Glenn Highway currently have rutting of the pavement significant enough to warrant repairs. While the need for repairs exists, there is nothing currently in the Statewide Transportation Improvement Program (STIP) for any near term projects to conduct the repairs. This section of the Glenn Highway is the highest volume traveled route in the State and is the main commuter corridor between Anchorage and the Matanuska-Susitna Valley. The funding identified in this request would allow repairs to the most seriously affected areas of the corridor that show the most significant rutting. These areas are the southbound lanes between North and South Birchwood, all lanes between Hiland Road and Artillery Drive, and all lanes between Peters Creek and Eklutna.
