**Additional Information / Prior Funding History:**

FY2008 - \$2,000,000; FY2007 - \$4,300,000.

**Project Description/Justification:**

The bridge was built in 1950. The current through-truss bridge has substandard clearances and restricts traffic along this National Highway System route. The bridge's vertical clearance is limited at fifteen feet and does not meet current standards. There are cracks in the bridge deck over the floor beams, piles exposed at the abutments, and the overhead bracing has impact damage.

This request reflects an updated engineer's estimate for the project.
