Additional Information / Prior Funding History:
 FY2009 - \$431,900; FY2007 - \$800,000.

Project Description/Justification:
 This is a federally-funded project that provides for preventive maintenance activities that demonstrate a cost-effective means of extending the useful life of a federal-aid highway. Preventive maintenance is a planned strategy of cost-effective treatments to an existing roadway system that preserves the system, retards future deterioration, and maintains or improves the functional condition of the system without significantly increasing structural capacity.
