This is a new FY10 Capital Request. The Gustavus Airport Runway Safety Area (RSA) does not meet Federal Aviation Administration (FAA) standards for the size of the area surrounding a runway that protects aircraft that land short, over-run, or veer off the paved runway surface. This project consists of the design and construction of an expanded RSA that will meet standards and improve safety for all aircraft operating at Gustavus. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
