Department of Natural Resources Ten-Year Expenditure Projection

The mission of the Department of Natural Resources is to develop, conserve, and enhance natural resources for present and future Alaskans. The department has three priority programs:

Development and Use of State Land and Natural Resources

Provide economic and recreational opportunities by facilitating responsible use and development of state land and water resources, which generate approximately 90% of the state's revenue. Acquire, dispose, and transfer state land. Defend title and rights to state land, navigable and public waters, and trails.

Natural Resource Conservation and Protection

Protect and enhance the value of state land and water resources and Alaska's coastal areas.

Wildland Fire Management

Provide wildland fire protection on state, private and municipal lands.

Development of the ten-year plan:

Division directors submit budget requests for current and subsequent years, and provide presentations to the Commissioner's Office to support their requests. Approved projects, proposals, and increases are scheduled in the ten-year plan as appropriate.

OPERATING BUDGET

Division of Oil & Gas- The need for funding will continue for arbitration of oil and gas royalty issues, which has historically resulted in net revenue for the state. Workloads will continue to increase due to increased gasline and geothermal lease activity, and potential platform abandonment issues.

Gas Pipeline Implementation (AGIA) Office- Activities will continue related to construction and use of a gas pipeline under the Alaska Gasline Inducement Act (AGIA).

State Pipeline Coordinator's Office (Joint Pipeline Office)- Right-of-way workloads will increase substantially as multiple gasline projects get underway and are completed. The bulk of the increase is expected to occur in FY14 – FY17.

Division of Mining, Land & Water- Transfer of lands as per statehood entitlement and resolution of discrepancies is expected to continue but at a slower pace due to lack of funding support from BLM. New initiatives include implementation of a guide

concession area program, increased efforts in trail management, increased staffing of the coal regulatory program to address workload and maintain primacy of the federal program, and compliance with environmental regulations related to gravel pits.

The agency currently experiences significant backlogs accompanied by very slow turnaround times for permit application processing. Additional workload increases are expected due to the increase of 8 million more acres of statehood entitlement land in the past five years, potential large mine projects, gasline development, alternative energy projects, litigation, and the increasing complexity of land issues.

Geologic Development- The federal government continues to reduce funding for the Alaska Volcano Observatory. In order to maintain monitoring efforts, other funding sources will need to be identified including state general funds. Increase in workload is expected as projects critical to the success of gas pipeline development, coastal impact assistance, and management of hydrologic resources increase.

Office of Project Management & Permitting (Large Project Permitting)- The largest mine projects ever conceived in Alaska are likely to move forward in terms of seeking permits and leases for operations in upcoming years. This, in addition to gasline projects and eventual increase in offshore exploration and development activity, will require solid funding for several positions in this office to be able to meet industry demands and keep economic activity moving forward.

Division of Forestry- New initiative requests related to adequate funding for forest management and best management practices will continue. The funding model for wildland firefighting was altered with the advent of early fire seasons. This is posing problems in terms of budget shortfalls and expenditure classification that DNR will attempt to address in future budgets. Costs for equipment such as helicopters and fixed wing aircraft are expected to continue to increase, due to limited suppliers and aging of the state's fleet. Development of crew capacity through hazardous fuel mitigation and biomass projects will be pursued, as well as potential development of a Wildland Fire Training Academy program in future years.

State Parks- In order to keep park facilities open, it will be necessary to increase both ranger presence and maintenance staff, as well as adequately address the deferred maintenance backlog. State Parks has an ongoing and increasing need for annual funding for health and sanitation projects, equipment replacement, and emergency repairs. New initiatives include development of a State Park Foundation.

Office of History & Archaeology (OHA)- Determinations from the OHA are a necessary part of the land use permitting processes. As workload increases in other areas due to increase in infrastructure and natural resource development, the workload here will also increase.

Agricultural Revolving Loan Fund (ARLF)- The ARLF will need to be recapitalized in future years to maintain sufficient loan funds for Alaska's agricultural development, starting in FY15.

Plant Material Center- New initiatives include a Land Laboratory (FY15) and a Horticulture Evaluation Program (FY13).

Agricultural Development - Expansion of efforts in support of the Alaska agricultural industry include promotion of the "Alaska Grown" logo, educational programs, and weed and pest control.

Mental Health Land Trust Office- Increases are expected in operating costs due to salary increases (for exempt employees), travel, and leases.

Support Services and Information Resource Management- Costs for information technology upgrades, licenses and ongoing maintenance that have previously been requested in the Capital Improvement Projects budget process will eventually be requested in the Operating Budget. The costs are ongoing and typical. Future initiatives include a statewide parcel database, pursuit of funding for underfunded agency chargebacks and core services costs, and a need to address recruitment and retention issues department-wide.

Natural Resources Conservation and Development Board (NRCDB)- Federal funding for soil and water conservation district projects has been largely eliminated. The NRCDB will likely continue to request general funds to support their ongoing programs.

CAPITAL PROJECTS BUDGET

Division of Oil & Gas- Reservoir studies and other types of evaluations will continue to be needed to ensure that information is sufficient to make determinations as to the existence and best use of state oil and gas resources.

The division's core business system is in need of major enhancement in order to remain functional.

The division will need to provide more information related to the impact of carbon dioxide (CO2) sequestration, as pressure continues from the federal government to meet mandates.

It is becoming increasingly necessary to prepare for the possibility of future platform abandonment in Cook Inlet.

The PSIO continues to grow in its role, and with finalization of the gap analysis, the need for staffing in this or other state offices related to pipeline integrity will be evaluated.

Gas Pipeline Implementation (AGIA) Office- Activities related to construction and use of a gas pipeline to deliver gas to the Lower 48 continue, and expenditures for outside consultants to advise the state will continue. Assessment of natural gas resources for all types of pipelines will need to be completed timely.

Division of Mining, Land & Water (ML&W)- The Matanuska-Susitna Hydrogeology Assessment is expected to be completed in FY12.

New initiatives include enhancements to improve and upgrade the Well Log Tracking System, increased efforts in evaluating and resolving major trail issues that are under the jurisdiction of ML&W, improvements to user access and facilities at the mouth of the Kasilof River, and the ability to address the most serious hazardous sites on state land.

Alaska Coastal Management Program- Alaska Coastal Management pass-through grants are expected to continue.

Geologic Development- The need for hazards assessment of gasline corridors and major mining operations will increase. Assessment of natural gas resources for all types of pipelines will need to be completed timely. Petroleum resource assessments on the North Slope are necessary to encourage exploration and capital investment in Alaska.

The Geologic Material Center will need to be replaced in order to be functional as a facility that provides and protects core samples and other materials critical to natural resource exploration and development decisions.

Division of Forestry- The cost of contracts for staging of firefighting equipment such as helicopters and fixed wing aircraft are expected to continue to increase, due to limited suppliers. State-owned aircraft for firefighting is also in need of replacement.

Older fire engines that are not on the state equipment fleet replacement program will continue to be replaced through FY20.

A facility on Trunk Road will need to be moved or abandoned.

Deferred and ongoing maintenance, and/or replacement of facilities will continue to be needed in order to maintain functional facilities.

Access roads and timber inventories will continue to be necessary for management and utilization of forest resources.

The Division continues to migrate to radios with narrow banded frequencies (Alaska Land Mobile Radio or ALMR). Equipment is needed for the migration, and to maintain the legacy system in areas where ALMR is not functional (basically, anywhere off the road system).

New initiatives will include an increase in geographic information systems capability; and new office, fire, and resource management facilities.

State Parks- The deferred maintenance backlog is huge and growing. At some point, a large influx of funding will need to be dedicated to eliminate the backlog and annually fund maintenance to prevent re-occurrence. Without this funding, park closures will continue to be considered where health and safety issues and park land protection cannot be otherwise addressed.

In order to keep park facilities open, it will be necessary to increase both ranger presence and maintenance staff, as well as adequately address the deferred maintenance backlog.

New initiatives include completion of the South Denali Visitor's Center.

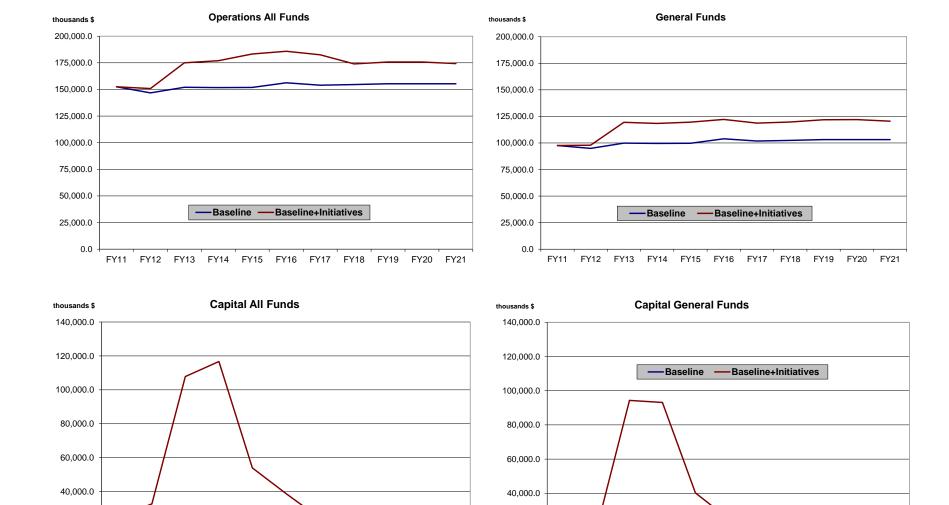

Plant Material Center- New initiatives include a Seed Cleaning Facility replacement (FY13), a Land Laboratory (FY15) and a Horticulture Evaluation Program (FY13). Continuing replacement and repair funding is needed for existing facilities and equipment.

Mental Health Trust Land Office- Ongoing facility maintenance will continue to be budgeted as an annual capital project.

Support Services and Land Records - Continuation of projects to create efficiencies and provide user-friendly services includes a document management system (electronic case files), web-based permitting processes (unified permit project), statewide digital mapping, and electronic recording capabilities for real property documents recorded and Uniform Commercial Code documents.

New initiatives include increased automation of the permitting and adjudication process, development of a statewide database of land ownership, and replacement of old and failing cubicle partitions and electrical connections in office areas. The state's aging billing and accounting system for unrestricted revenue generated by land permits and leases and oil and gas royalty revenue needs to be updated.
