Project Description/Justification:

The Wildwood Correction Center (WWCC) was constructed in 1981 and contains 18,000 square feet of space. This project will provide control room (building #10) security control design at the WWCC.

This project is from a compilation of essential capital requirements at this institution. A list of known projects is formulated in late October or early November each year. The actual list of projects is fluid between the time that the list is prepared and the time the appropriation is authorized. During this time period, other critical projects are identified with several of the already identified projects being completed. Funds are then allocated to the most urgent of the remaining projects. The projects that could not be accomplished become the basis of the next fiscal year capital appropriation request.

Adjustments to the allocated funding maybe necessary between all 24-hour institutional facilities to meet emergency needs as they arise.
