Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
<b>Totals:</b>	<b>0</b>	<b>0</b>

**Additional Information / Prior Funding History:**

First year request.

**Project Description/Justification:**

Individuals with disabilities often require assistive technology devices in order to live independently, perform well in school, and maintain employment. They are also more likely to live in poverty and lack resources to investigate and purchase outright these sorts of devices.

Assistive Technology of Alaska (ATLA) reports that 90% of children and adolescents use computers as part of their education process, and over half of employed people use computers in their work. Access to specialized equipment is important to educational and employment success for people experiencing disabilities. Assistive technology is also very important to individuals seeking to achieve the highest level of independence possible.

Assistive technology devices include but are not limited to:

- augmented and alternative devices, like picture charts, book, and specialized computers;
- computer software and devices to assist with education, employment, or environment needs; and
- appliances and tools to aid daily living, ranging from simple devices to control lighting to complex systems like chin controls and controls governed by eye movements.

ATLA is the primary provider of assistive technology consultations, counseling, and products.

**MH Assistive Technology**

**FY2013 Request: \$125,000**  
**Reference No: 54250**

---

**Mission:**

To promote and protect the health and well-being of Alaskans.

**End Result:**

The mental health of Alaskans is optimized. Vulnerable Alaskans have a safe living environment.
