for the amount of funds anticipated next year, including any other incentives that may be available as a high performing PHA.

Program Description:

The Federal government, through the U.S. Department of Housing and Urban Development (HUD), provides PHAs with money each year to help renovate and modernize their public housing through the Capital Fund Program. To access this money, each PHA, with the active involvement of residents and local government officials, must develop a comprehensive (five-year) plan detailing modernization needs within the PHA's housing inventory and establishing a timetable for meeting those needs. The dollar amount of the annual grant is established by a formula using the number, configuration, and size of the PHA's low rent units. The annual grant also provides funds for administrative expenses, tenant-education projects, drug-elimination/safety projects, and management improvements.

Projects funded by this year's request include: a set aside for the San Roberto Redevelopment; renovation or replacement of various public housing units statewide; code compliance issues; and energy audits.

Also included are funds to provide operation and management improvements, such as PHA staff training; resident training; training for low-income businesses; and upgrades to the information system and area-wide network enhancements at low rent developments.
