

Sport Fish Recreational Boating Access**FY2014 Request: \$3,000,000****Reference No: 30432****AP/AL:** Appropriation**Project Type:** Construction**Category:** Natural Resources**Location:** Statewide**House District:** Statewide (HD 1-40)**Impact House District:** Statewide (HD 1-40)**Contact:** Charles Swanton**Estimated Project Dates:** 07/01/2013 - 06/30/2018 **Contact Phone:** (907)465-6184**Brief Summary and Statement of Need:**

This annual project authorizes the Division of Sport Fish to continue to construct and upgrade recreational power boating and sport fish access facilities statewide using Sport Fish Restoration apportionment funds comprised of 75% federal assistance and 25% non-federal match. Federal regulations require that 15% of the annual Sport Fish Restoration (Dingell-Johnson/Wallop-Breaux Amendment) apportionment will be dedicated to projects that benefit recreational power boaters. Projects include boat launches, mooring floats, parking lots, restrooms, fish cleaning facilities, and other services.

Funding:	FY2014	FY2015	FY2016	FY2017	FY2018	FY2019	Total
Fed Rcpts	\$2,250,000						\$2,250,000
G/F Match	\$750,000						\$750,000
Total:	\$3,000,000	\$0	\$0	\$0	\$0	\$0	\$3,000,000

Prior Funding History / Additional Information:**Project Description/Justification:**

Sport Fish Restoration (SFR) funds require a match of one state dollar for every three federal dollars, or a state match of 25% of the total project cost. In years past, this project included the required match from the Fish and Game Fund (if local government non-federal match was unavailable). However, due to recent Fish and Game Fund revenue declines, in FY2014 general fund match will be used to support the match requirement. The required match dollars are an investment that produces an instant threefold return. Since federal SFR funds are derived from excise taxes on the sale of sport fishing tackle, this capital request is a user pay/user benefit approach to providing access facilities.

The facilities that result from this project improve recreational boating and sport fishing access to the fish and wildlife resources of the state. The Federal Assistance in Sport Fish Restoration Act (16 USC 777-777k), also known as the Wallop-Breaux (W-B) / Dingell Johnson (D-J) program mandates that

15% of the federal funds available to the state be set aside for boating access improvement and development projects. Any portion of the 15% set-aside for boating access projects that is unused reverts back to the U.S. Fish and Wildlife Service and is lost to the state. Therefore, it is in the state's best interest to utilize these funds.

The annual amount of the federal receipts request is based on a set five-year 15% average of Alaska's federal apportionment of W-B funds, (currently covering federal FY2013-2017). The actual capital project may not equate to 15% of the current W-B apportionment since the capital request is submitted prior to the issuance of the final federal apportionment. Failure to use these funds this year will result in the annually allocated federal funding being reverted back to the federal government and therefore lost to the state of Alaska.

Sites will be selected so that all regions of the state receive a share of this program. Site development projects will be accomplished in cooperation with local government units and other state agencies. It has been the experience of the department that local communities are very supportive of better access facilities.

This project will provide some new access sites and will renovate or upgrade other sites. Many of the existing access sites throughout the state have either reached the end of their useful life and/or do not meet current standards. These sites no longer adequately serve the public and are very expensive to maintain. The facilities provided by this project will be designed for low maintenance over a service life of 20 years. The facilities will also be accessible to users with disabilities in compliance with the Americans with Disabilities Act.

User fees can be established for new and renovated facilities to place them on a self-supporting basis. User fees will be charged where feasible and will be used to offset the cost of site operation and maintenance. Under federal regulations, user fees charged at a facility developed with federal funds must be used for the operation, maintenance, or improvement of the facility. Fees collected in excess of actual site operation and maintenance costs must be credited back to the federal program. This ensures that the users of the facility benefit from the fees they pay. With the combination of local community support and user fees, it is not anticipated that future operating budget requests will be needed to support the sites developed under this project.

Development and maintenance of angler and recreational boating access facilities and improvements is a core function and goal of the Division of Sport Fish Strategic Plan. One of the performance measures of this goal is to complete construction of a total of five priority boating access projects per year over a five year period. Additional and enhanced recreational boating access facilities are needed in order to provide improved and greater sport fishing opportunity throughout the state.

This project contributes directly to the Department's mission through its impact on the Division's ability to maintain and improve angler access to the fish resources of the state as well as the Division's core function "Angler Access".
