**Detailed Project Description and Justification:**

40 x 60 all metal building on cement pad. Two bay doors with man doors and windows. Insulated with spray foam or other insulation. Electrical lights, etc.. Water fill station.

We need emergency fire equipment in the village. The village is not on the road system. There is no way for a fire truck to get to our place. We have had three houses burn so far. We could have saved them if we had fire equipment. Kachemak Emergency services told us if we get a building they will give us a truck.

**Project Timeline:**

If and when we get the grant, it shouldn't take more than a year to finish. Would start in May-June for expenditures.
