Project Description

Principal's Priority 1

The original exit doors do not close securely. The mullions are designed with four bolt mountings systems. However, the narrow door frames only accommodate two of the four bolts. This creates security issues and significant energy loss. Exterior doors blow open randomly.

Benefits if Project is Funded

Improved safety and energy efficiency.
The doors need to be adjusted nearly monthly. Wear and tear from misalignment will continue to deteriorate security and efficiency.

Impacts if Project is not Funded
