Project Description

Principal's Priority 4

Request is submitted to purchase a replacement light board for the Dimond High auditeria. The existing light board is extremely worn due to consistent use by students and staff.

Benefits if Project is Funded

The purchase of a replacement light board will provide students with a better tool in which to understand the dynamics of using a light board to control and manage stage lighting. Students will also learn about the interaction between the electronics of the light board as it relates to controlling lights, dimmers and other device for theatrical scenes. If the current light board is not replaced, it will soon become inoperable and the school will be left without this important piece of equipment that is need for auditeria usage.

Impacts if Project is not Funded

# of Students impacted by project 300
