Detailed Project Description and Justification:

Three years ago at Nikiski Middle/High School we had the opportunity to integrate sixth grade into our already existing grades of 7 -- 12. While we were able to continue to offer a variety of options for our students, with the increased enrollment also came an increase in demand for our athletic facilities. We currently have one main gymnasium that is in use from the beginning of the day until well into the evenings. During times when we have multiple activities at one time, including PE classes, our commons is utilized on a regular basis, usually by our middle school students. The commons floor is tile on top of concrete and does not have the "give" that a gym floor does.

After conducting some research on all-purpose floors, we found a product that would go over an existing floor without any construction. The material would fit together without any glue or adhesives, only a floor covering the existing tiles. The floor would also be used as our lunch area and provides for easy cleanup.
