Project Description/Justification:

The Department of Correction is responsible for maintaining approximately \$16.5 million of state-owned equipment. Replacement of old and worn-out equipment has been deferred for many years, which severely reduces security and operational capability. In order to maintain efficient correctional facility operations, the replacement and repair of antiquated security and life/safety equipment is required on a continuous basis. This equipment is used constantly and continually supporting the life, health, and safety needs of approximately 2,700 inmates per day. Their sustained use requires budgeting for routine replacement of old and worn out equipment every fiscal year.

The amount in this budget request does not meet the level necessary to address all the identified equipment requirements. The funds appropriated will be used to meet the most essential following identified FY2001 equipment needs;

Anvil Mountain CC (Nome)	\$12.0	Portable Saber Radios (6)/ Security	
Cook Inlet CC (Anchorage)	\$97.3	Portable Radios (14)/Security, Replacement Dishwasher, Steam	Kettle.

Statewide	<u>\$103.0</u>	Prisoner record files, defibrillators, sucter machines, medical dental equipment.	and
TOTAL EQUIPMENT	\$827.8		

Without these funds, the Agency will have to cover the costs of the needed equipment from existing operating funds as required. This action would reduce the capability of Instititons to address staff and operating costs that already exist. In most cases, institutions would have to hold increased vacancy to free up funds to cover equipment needs. This action would increase overtime costs for security and safety staff when most institutions are already overburdened with high prisoner counts. The safety of staff and prisoners would be jeopardized as staff remain on-duty longer and longer trying to cover short-staffed posts.
