Additional Information / Prior Funding History:

Project Description/Justification:

This project, the first upgrade to the food preparation area since the 54,000 square foot school was constructed 40 years ago, will bring the kitchen into conformance with current building codes and DEC health standards. Current lighting is poor and exhaust fans are either inadequate or nonexistent. Most cold food storage is located elsewhere, so employees must gather meals each day from residential refrigerators and freezers and brought to the school for preparation. This project will provide new equipment on site and upgrade the electrical, plumbing and exhaust systems to support it. It will remove a sheet of asbestos and install a fire suppression system throughout. Proposed cost: \$448,610.
