Additional Information / Prior Funding History:

Project Description/Justification:

In the summer of 1997 the existing school well failed. A new well is not a viable option. The groundwater has proven to be of high iron content and not potable. Plans call for a (buried) pipe to be installed from the existing PHS building to the school, a mechanical design to implement water circulation and line heating capability, and a bathroom facility to be installed in the high school building. Proposed cost: \$183,176.
