Spirit Camp Facility Development

Reference No:

FY2001 Request:

\$100,000 32448

AP/AL: Appropriation Project Type: Construction

Category: Health/Human Services

Location: Minto Contact: Larry Streuber

House District: Rural Interior (HD 36) **Contact Phone:** (907)465-1870

Estimated Project Dates: 07/01/2000 - 06/30/2003

Brief Summary and Statement of Need:

This project would replicate the successful Spirit Camp at Old Minto which cannot adequately address the significant need for such culturally-relevant, family-oriented chemical dependency treatment programs statewide. Research based data show the significant positive impact on the recovering person and family members, when the family is involved in the treatment process. If this project is not funded now, many Alaskans severely impaired by alcohol and drugs will not receive needed treatment. Families experiencing the effects of substance dependency such as domestic violence, child abuse and economic insecurity will continue to be at risk for harm and in need of additional support services at a cost to the State.

Additional Information / Prior Funding History:

In SLA 97, \$60,000 was appropriated though a revised program legislative for grant for a Spirit Camp at Minto.

Project Description/Justification:

These capital funds would develop new spirit camps with regional partnerships participating in the projects. This funding is associated with an operating project of \$143.3 MHTAAR for spirit camp development.

Performance Measures:

This project would replicate the successful Spirit Camp at Old Minto which cannot adequately address the significant need for such culturally-relevant, family-oriented chemical dependency treatment programs statewide. Research based data show the significant positive impact on the recovering person and family members, when the family is involved in the treatment process. Culturally relevant programs attract many Alaska Native residents who otherwise may not participate in or benefit from more standard treatment services offered elsewhere. If this project is not funded now, many Alaskans severely impaired by alcohol and drugs will not receive needed treatment. Families experiencing the effects of substance dependency such as domestic violence, child abuse and economic insecurity will continue to be at risk for harm and in need of additional support services at a cost to the State.

[•] At least one spirit camp will receive funds for facilities.
