**Brief Summary and Statement of Need:**

The EPA mandated On Board Diagnostic (OBD) test for 1996 and newer vehicles is 1/1/2001. In the OBD test, a vehicle's computer determines an Inspection and Monitoring pass or fail. It is anticipated that modifications to the OBD test will need to be made in order to insure local concerns are addressed through slight software changes and Inspection and Monitoring technician training. Emissions benefit determination and some public awareness are needed for the transition.
