PROJECT JUSTIFICATION:

**Anchorage International Airport: Environmental
Compliance and Cleanup**

FY2001 Request: \$2,000,000
Reference No: 32494

Compliance with the Clean Water, Clean Air and Hazardous Waste Management Related Acts is required by Federal Law. Contamination and waste from historical activities, airport and tenant operations must be remediated and disposed of properly, in addition to standard environmental compliance actions and operations of the facility. Steps are being taken to reduce future problems through pollution prevention education, while past contamination is being treated as required. This funding is intended to be spent as projected and could change to meet regulatory demands and priorities.
