

**Fairbanks International Airport: East Side Utilities Phase 1 Construction**      **FY2001 Request: \$525,000**  
**Reference No: 32513**

**AP/AL:** Allocation      **Project Type:** Construction  
**Category:** Transportation  
**Location:** Fairbanks Areawide      **Contact:** Kurt Parkan  
**House District:** Fairbanks Areawide (HD 29-34)      **Contact Phone:** (907)465-3900  
**Estimated Project Dates:** 07/01/2000 - 06/30/2004  
**Appropriation:** Airport Improvement Program

**Brief Summary and Statement of Need:**

This project will extend the public utility water and sewer mains north along University Avenue for a distance of 1,500 feet, thereby providing service to the developable area planned for additional lease lots.

**Project Description/Justification:**

The FAI Master Plan had identified the area north of the existing General Aviation lease lots as the best suited for additional lease lots. FAI has reached the point where very little leasable space is available to offer new prospective tenants. We began the process of developing the identified area by extending Taxi Lane Delta to the north up to Float Pond Road, and totally relocating the Air Camping Park. This project was accomplished during the 1998 construction season and provided the area for new aircraft access and parking ramp development. However, to complete the development, the infrastructure of water and sewer mains needs to be extended to provide service to new tenants. This also provides the availability of water to support firefighting, fire suppression systems within hangars and other facilities as well as restrooms for tenant employees and customers. Further, this project will eliminate the need to install septic systems, which would become an environmental issue in the future.
