The DOL Liaison will represent the department in all inter- and intra-agency deliberations; provide liaison and outreach to external stakeholders with regard to employment and training of Alaskan workers and socio-economic impacts in general; and provide for appropriate review of mechanical, electrical and health and safety issues attendant to the application process. Stakeholders include contractors, communities, labor organizations, Alaska Native organizations, and others. The position will be funded through an unbudgeted RSA with the Dept of Natural Resources.

To simplify the process of billing federal grants, all federal authorization for the Commissioner's Office is being consolidated into the Management Services component. The Management Services component will do a single billing to the federal government and transfer funds to the Commissioner's Office through an RSA as interagency receipts. The Management Services component includes a transaction offsetting this one.

Several positions in the Commissioner's Office (CO) are supported by the department's federal Indirect Cost Plan. Due to position cost adjustments and a change in which Auditor position is included in the CO, there is a need to increase interagency receipt authorization. Current indirect cost collections are sufficient to support this increase.												
Line Item Transfer to Align Authorization with Spending Plan												
	LIT	0.0	0.0	0.0	0.0	1.8	-1.8	0.0	0.0	0	0	0
This line item transfer from equipment to supplies is due to a change in the dollar limit being applied to the definition of equipment. The change is to increase it from \$500 to \$5,000. This will cause supply costs to increase as a result of purchases between \$500 and \$5,000 which formerly were accounted for in the equipment line. Examples of items under \$5,000 that will be considered supplies include personal computers, printers, fax machines, small copiers, etc. This change will simplify our federal reporting by aligning our accounting with federal reporting requirements for equipment.

The Alaska Human Resource Investment Council (AHRIC) will be taking over the management and technical assistance of the post secondary Carl Perkins Program going to six regional community colleges. This will be funded by an RSA for \$145.0 from the Department of Education & Early Development (DOE) and will support an Education Specialist II position. The financial management of these grants will remain a DOE function.

The AHRIC will also assume responsibility for the WorkStar program which is an initiative by the Governor to recognize the outstanding welfare to work

<p>employers and employees. This RSA for \$65.0 from the Department of Health & Social Services will support 50% of an existing AHRIC project coordinator position. Gaining an understanding of the needs of welfare recipients transitioning to employment and the concerns of employers is an important concern of the AHRIC.</p> <p>Funded through a \$75.0 RSA from the Department of Education, the AHRIC will be taking over the management, assessment and technical assistance responsibilities for the certification of the post secondary vocational education institutions. The responsibility for the financial analysis of these institutions and the accreditation process will remain the responsibility of the Commission on Post Secondary Education.</p> <p>An RSA from the University of Alaska for \$50.0 to support the activities of AHRIC as they relate to the mission of the University is also being added.</p> <p>In addition there is a small decrease of (\$2.3) in interagency receipt authorization included here. This adjustment is the difference between the increased authorization added for Year 3 Labor Costs as compared to the actual projected receipts.</p>

Because of an inability to recruit qualified Analyst/Programmer IV's, we have reclassified three flexibly staffed positions to Analyst/Programmer I's (A/P I) and will use the resulting savings from personal services to add an additional A/P I position to bring the training pool to four positions and to provide training to advance these employees as quickly as possible. Savings will also be used to provide training funds for other existing staff.

Increased authorization is needed to reflect an increase in the RSA to the Dept of Administration for mainframe computer use (237.6). This is partly offset by some minor reductions (5.3) in other areas. The increased costs, associated primarily with federal programs, will be allocated and billed to the federal government and departmental programs as appropriate.

This line item transfer from equipment to supplies is due to a change in the dollar limit being applied to the definition of equipment. The change is to increase it from \$500 to \$5,000. This will cause supply costs to increase as a result of purchases between \$500 and \$5,000 which formerly were accounted for in the equipment line. Examples of items under \$5,000 that will be considered supplies include personal computers, printers, fax machines, small copiers, etc. This change will simplify our federal reporting by aligning our accounting with federal reporting requirements for equipment.

The Workforce Information Council (WIC) was established in response to the Workforce Investment Act, which calls for the Secretary of Labor, through the Bureau of Labor Statistics and with other federal agencies and State employment statistics representatives, to plan for and oversee the nationwide workforce information system. The Employment & Training Administration (ETA), a federal member of the WIC, has made funds available to facilitate the implementation of research and administrative support to the council.

This authorization is needed due to a change in the existing program, previously the department received funds for the federal program from the State of North Carolina which received the funds and distributed them to states performing various functions. This caused them to be classified as Statutory

This general fund increment will fund two new Wage and Hour Technician positions; one in Anchorage (07-#034), and one in Fairbanks (07-#033). This will enable the section to perform routine monitoring of certified payrolls and increase compliance enforcement efforts. The result will be more unpaid wages being returned to workers due to audits that reveal violations.

Without routine payroll audits and monitoring by the Wage and Hour program, contractors who underpay workers have an unfair competitive advantage. By bringing into compliance those contractors who are currently operating illegally, the program levels the playing field for law-abiding contractors who bid for

1004 Gen Fund		240.2										
This increment will fund two new Boiler/Pressure Vessel Inspectors (PCNs 07-#035 and 07-#036) in the Mechanical Inspection program in Anchorage. These two inspectors are expected to perform a total of 2,400 inspections per year, which should substantially reduce the existing inspection backlog.												
The increment also funds an additional Administrative Clerk II (07-#037) in Anchorage. This position is necessary to process the additional inspection reports, invoices and payments received.

1004 Gen Fund		92.0										
This general fund increment will fund an Electrical Inspector position in the Fairbanks office. The northern region has been without a dedicated electrical inspector for a number of years. This position will share the workload currently split between the two existing electrical inspectors, which should allow the division to provide more timely and available inspection services throughout the state.												
Line Item Transfer to Align Authorization with Spending Plan												
	LIT	0.0	0.0	0.0	0.0	0.7	-0.7	0.0	0.0	0	0	0
This line item transfer from equipment to supplies is due to a change in the dollar limit being applied to the definition of equipment. The change is to increase it from \$500 to \$5,000. This will cause supply costs to increase as a result of purchases between \$500 and \$5,000 which formerly were accounted for in the equipment line. Examples of items under \$5,000 that will be considered supplies include personal computers, printers, fax machines, small copiers, etc. This change will simplify our federal reporting by aligning our accounting with federal reporting requirements for equipment.

This increment would fund two new positions for the oil safety and development initiative. The positions include one Industrial Hygienist position (PCN 07-#031) in Anchorage, and one Electrical Inspector (07-#032) in Anchorage. These positions would provide compliance and inspection services to new and existing wells and drilling projects. Activities associated with the Trans-Alaska Pipeline and the proposed natural gas pipeline are not included in this proposal.

This increment would provide additional matching funds that will allow the OSH program to fill an industrial hygienist position that has been vacant for some time due to lack of sufficient match for available federal monies. Filling this position would allow the program to increase the number of consultation visits completed annually (currently the program has a two-month backlog on health consultation requests), and allow the program to implement several new and proposed partnership agreements. Additional staff will also enable the program to improve on its annual objective of enrolling new employers in the Voluntary Protection Program and the Safety and Health Achievement Recognition Program.

The Employment Security Division Director's Office is located in the Employment Services (ES) component and we have now allocated all the Director's Office (DO) costs to the programs throughout the division. Previously, the DO costs were paid entirely by the ES programs, but most of the ES federal grants have been flat funded and cannot continue to support the same funding level. The allocation of costs will be based on FY01 actual personal services and will be approved by USDOL.												
The ESD DO costs have increased approximately \$150.0 this year due to a couple of new federally funded positions and related non personal service costs. Part of the transfer from other components covers this increase, but most of the transfer covers the equitable distribution of costs among all ESD programs and offsets flat funding of the ES federal grants.

Line item transfer from personal services to contractual to align authorization with staffing levels and to accomodate higher than projected spending for contractual and travel. The transfer from equipment to supplies is due to a statewide change in the definition of equipment. Items costing less than \$5,000 (previously \$500) are now considered supplies. As a result, items previously identified as equipment will be budgeted in the supply line. For example, personal computers, printers, fax machines, small copiers, etc. are now counted as supplies. This change aligns division equipment accounting with federal reporting requirements.

Four non-permanent program service aides funded by federal Workforce Investment Act monies are required in the Juneau, Kenai, Ketchikan job centers and Juneau central office. These positions (07-Z013, 07-Z014, 07-Z015, 07-Z016) are temporary and provide job training experience to eligible Welfare to Work clients. They handle basic customer service and office duties during their employment period.

A PFT Employment Security Analyst I position (07-5968) is required in the Job Training Programs (JTP) central office in Juneau to administer federal grants. And a PFT Community Development Specialist I position (07-5969) is required in the JTP Bethel office to provide continued service to rapid response clients. These positions replace the nonperm positions (07-N093 and 07-N099) which ended June 30th and were deleted in the Governor's FY2002 budget. The workload for the federal Workforce Investment Act (WIA) is increasing and not decreasing so these positions are needed permanently.

A PFT Employ Sec Analyst II (PCN 07-#027) is needed as the Assistant Director for Job Training has no direct professional staff. This position would provide on-site support to react quickly to requests from the Director's or Commissioner's office. This support will alleviate the current practice of assigning additional work to front line staff that are already at capacity. The position is funded from the federal WIA grant.

A PFT Comm Devel Spec II (PCN 07-#028) is needed as the Balance of State does not have a professional level position dedicated to the federal WIA Youth programs. This new program is a more complex, year-round program which has resulted in the use of much more sophisticated grants to deliver these services. As evidenced by working under Operation Re-New Hope last year, these services require the assistance of a full-time professional level staff person to be effectively managed. This position would assist and support the Youth Council, directly manage some of the new statewide youth training

grants and serve as the technical expert on staff for youth programs for Balance of State, Local Workforce Investment Board staff; including training and advising field office staff.												
Two PFT Voc Rehab Counselor I positions (PCN 07-#029 & 07-#030) are needed as we currently have an increased demand for Vocational Counseling services in Anchorage as well as Western Alaska. One position would be exclusively assigned to work in the Anchorage AJCN Offices. This position would be funded entirely through federal WIA dollars to be negotiated with the local One Stop operator (Anchorage Municipality). The second position is needed to address the increasing demand associated with Alaskans located in Western Alaska. This position is based in Anchorage, but the position is itinerant and flies to rural areas. We currently do not have adequate resources to cover these needs especially given the fisheries disaster. Besides funds available through federal WIA dollars, additional new funding recently made available through federal discretionary sources, specifically earmarked USDOL secretary's reserves, may be available for this position as well.

The Employment Security Division Director's Office is located in the Employment Services (ES) component and we have now allocated all the Director's Office (DO) costs to the programs throughout the division. Previously, the DO costs were paid entirely by the ES programs, but most of the ES federal grants have been flat funded and cannot continue to support the same funding level. The allocation of costs will be based on FY01 actual personal services and will be approved by USDOL.												
The ESD DO costs have increased approximately \$150.0 this year due to two new federally funded positions and related non personal service costs. Part of the transfer from other components covers this increase, but most of the transfer covers the equitable distribution of costs among all ESD programs and offsets flat funding of the ES federal grants.

Line item change from grants to personal services to fund increased personal services costs. Grant line authority is available for transfer as it exceeds projected expenditures. The line item transfer from equipment to supplies is due to a change in the dollar limit being applied to the definition of equipment, the change is to increase it from \$500 to \$5,000. This will cause supply costs to increase as a result of purchases between \$500 and \$5,000 which formerly were accounted in the equipment line. Examples of items under \$5,000 that will be considered supplies include personal computers, printers, fax machines, small copiers, etc. This change will simplify our federal reporting by aligning our accounting with federal reporting requirements for equipment.

The Employment Security Division Director's Office is located in the Employment Services (ES) component and we have now allocated all the Director's Office (DO) costs to the programs throughout the division. Previously, the DO costs were paid entirely by the ES programs, but most of the ES federal grants have been flat funded and cannot continue to support the same funding level. The allocation of costs will be based on FY01 actual personal services and will be approved by USDOL.												
The ESD DO costs have increased approximately \$150.0 this year due to two new federally funded positions and related non personal service costs. Line item transfer from contractual to personal service to accomodate personal services staffing costs. The line item transfer from equipment to supplies is due to a change in the dollar limit being applied to the definition of equipment, the change is to increase it from \$500 to \$5,000. This will cause supply costs to increase as a result of purchases between \$500 and \$5,000 which formerly were accounted in the equipment line. Examples of items under \$5,000 that will be considered supplies include personal computers, printers, fax machines, small copiers, etc. This change will simplify our federal reporting by aligning our accounting with federal reporting requirements for equipment.

The Employment Services component needs additional I/A authority to fund the development of an Automated Worker Skills Inventory Program to serve Western Alaska as well as Statewide. The system will match job seekers skills with local employment opportunities. The information system will be made available to other state agencies, native organizations, and private employers. The project will be funded by a reimbursable service agreement from the University of Alaska. Employment Services will initiate a Request for Proposal (RFP) solicitation for the purchase of a computer system. The solicitation will be nationwide and the anticipated cost of the system is approximately \$500.0. In addition, \$250.0 will be used for either professional service contracts or reimbursable services agreements to get the Automated Worker Skills Inventory Program customized for Alaska.												
The Job Training Programs component has excess I/A authority due to the elimination of the State Training and Employment Program (STEP) reimbursable service agreement (RSA). The FY 02 budget included a new classified PFT (07-?030) position to provide interpreter services for deaf individuals to staff and consumers of Vocational Rehabilitations services. There is no job class in the state system that matches the proposed job duties so a short term exempt position (07-0013) was requested and approved at the beginning of this year. This position will develop the materials and documentation required to establish the interpreter position within the state personnel system. Once established the permanent position will be classified and filled and the exempt position will be deleted.

Transfer authorization from personal services to contractual and supplies. Several long term employees have retired since the budget was prepared and replacements were hired at a lower step and or range. This transfer brings personal services authorization in line with anticipated expenditures. Increased costs are expected in various areas of contractual and supplies. New staff will require additional consultation hours with medical doctors to review medical records and professional advice about consumers of program services will be necessary. The increase in commodities will allow DVR to continue to hire persons with special needs and establish work stations that meet those needs.

The line item transfer from equipment to supplies is due to a change in the dollar limit being applied to the definition of equipment. The change is to increase it from \$500 to \$5,000. This will cause supply costs to increase as a result of purchases between \$500 and \$5,000 which formerly were accounted for in the equipment line. Examples of items under \$5,000 that will be considered supplies include personal computers, printers, fax machines, small copiers, etc. This change will simplify our federal reporting by aligning our accounting with federal reporting requirements for equipment.

This transfer is necessary to fund the three additional positions added to implement a prototype process to adjudicate disability claims. All positions are 100% federally funded by the Social Security Administration (SSA). SSA has committed to paying costs associated with implementing this new process. The funds are available from the contractual line from anticipated savings in project administration (contract employees to assist with case backlog) due to the addition of staff.

PCNs 07-7004 Program Coordinator, 07-7005, and 07-7006 (both Project Assistants) were created to facilitate the US Department of Labor Work Incentive Grant. This is a three year grant beginning October 1, 2000 and continuing through September 30, 2003. These positions were requested and approved in the budget as non-permanent positions. However, three years exceeds the normal time allowed for a non permanent position so these were hired as full time regular positions. It is understood that these positions are contingent upon this grant funding.
