## Component Mission

To manage the state's financial exposure due to loss.

## Component Services Provided

Using contract independent claims adjusters and in-house defense counsel (Department of Law), Risk Management operates a comprehensive self-insurance program that promptly resolves the state's property and casualty claims more cost effectively than through conventional commercial insurance programs.

## Component Goals and Strategies

- Act as the insurance carrier for each State agency, funding all sudden and accidental property and casualty claims
- Purchase high limit excess insurance protection for catastrophic loss exposure.
- Establish annual rates for agencies based on five year averages to allow agencies to plan for risk management cost.

## Key Component Issues for FY2003-2004

Risk Management, exclusively funded by interagency receipts, attempts to pay all claim settlements and defense costs as they become due and payable, drawing from the Catastrophic Reserve Account (CRA) whenever there is insufficient appropriation to meet ongoing claim obligations.

Financing of the state's comprehensive self-insurance program continues to be dependent on the CRA to meet the actual cost of risk each year. Over the last six fiscal years, Risk Management has averaged claims expenditures greater than $\$ 5.5$ million beyond authorized appropriations. This account is annually refilled by a year-end "sweep" of unexpended general funds from other state operating budgets. As general fund budgets continue to be reduced, the available sweep has declined. The department is again requesting a new alternative and reliable funding mechanism to meet the state's ongoing cost of claims and avoid supplemental fund requests for individual judgments.

As projected last year, steep increases in premiums were experienced at FY2003 coverage renewals. Without increased funding the state was forced to make difficult decisions on which reinsurance programs to not renew - thereby exposing state agency activities and operations to comprehensive catastrophic exposures for the first time.

## Major Component Accomplishments in 2002

- Finalized and presented all loss claims for the Court Plaza oil spill - recovered almost $\$ 1.2$ million from both boiler and machinery and excess property insurers
- Replaced Risk Management Information System (RMIS) with web based client server system
- Continue to manage owner provided insurance program for Ted Stevens Anchorage International Airport expansion project - providing comprehensive coverage for all contractors at significantly reduced project costs
- Underwrite workplace violence prevention, marine employee fire response, workplace safety and emergency medical training programs and limited security patrol services
- Advise agency safety committees focusing on workers' compensation loss trends to develop prevention strategies
- Address high risk agency supervisors explaining tort liability, review operating practices to mitigate future loss exposures
