

**Nearshore Marine Research Studies - V**

**FY2004 Request: \$998,000**  
**Reference No: 38484**

**AP/AL:** Appropriation **Project Type:** Planning  
**Category:** Natural Resources  
**Location:** Statewide **Contact:** Doug Mecum  
**House District:** Statewide (HD 1-40) **Contact Phone:** (907)465-4150  
**Estimated Project Dates:** 07/01/2003 - 06/30/2008

**Brief Summary and Statement of Need:**

Funds from the National Marine Fisheries Service (NMFS) will be used to develop nearshore commercial fisheries that foster economic development of coastal communities.

**Additional Information / Prior Funding History:**

FY00 - \$1.2 million; FY02 - \$1.8 million; FY03 - \$976.7

**Project Description/Justification:**

In Federal Fiscal Year 2003 and 2004, the U.S. Congress appropriated funds to the National Marine Fisheries Service that are earmarked for the Alaska Department of Fish and Game (ADF&G) for the development of nearshore commercial fisheries that foster economic development of coastal communities. The primary purpose of these funds is to assist ADF&G in conducting stock assessment and research as prerequisites to developing fishery management plans for sustainable fisheries on previously unexploited or lightly exploited marine resources. A secondary objective is to conduct critical research on fisheries at risk due to insufficient information on abundance, productivity, and life history. Developing or potentially developing fishery species for which research is targeted include sea urchins, sea cucumbers, geoduck clams, razor clams, dogfish, and black rockfish. Existing nearshore fisheries needing critical research include lingcod, sablefish, shrimp, golden king crabs, and Dungeness crabs.
