

Deferred Maintenance, Renewal, Replacement and Equipment

FY2004 Request: \$1,400,000
Reference No: 31862

AP/AL: Appropriation

Project Type: Deferred Maintenance

Category: Health/Human Services

Location: Statewide

Contact: Larry Streuber

House District: Statewide (HD 1-40)

Contact Phone: (907)465-1870

Estimated Project Dates: 07/01/2004 - 06/30/2008

Brief Summary and Statement of Need:

Funds deferred maintenance at 37 state-owned buildings with a replacement value of \$250 million, along with selected leased facilities, including urgent immediate repair, renovation and equipment needs. Delay in funding will cause additional deterioration of the Department's facilities. Urgent repairs and deferred maintenance cannot be delayed without adversely affecting the State's investment in its facilities.

Project Description/Justification:

This project funds deferred maintenance at Department of Health and Social Services (DHSS) facilities statewide, including immediate and critical renewal, repair, replacement and equipment needs. The Department is responsible for 38 State-owned facilities (25 of which are 24-hour facilities) with an estimated replacement value of \$250 million. The Department is also responsible for a limited amount of special repairs and upgrades not covered by lease agreements at over 80 leased sites. The Department's facilities have ongoing as well as deferred maintenance and equipment needs resulting from heavy usage by staff and a variety of client groups. Funds will address these needs and maintain the State's investment in the Department's facilities.

Project List

The Department has currently identified nearly \$6 million in deferred maintenance, renewal, replacement, and equipment projects, not requested elsewhere, for which the funds requested here will be used. The federal authority requested is

Deferred Maintenance, Renewal, Replacement and Equipment

FY2004 Request: \$1,400,000
Reference No: 31862

from federal indirect cost recoveries from various federal grants administered by the department that directly and/or indirectly benefit from the deferred maintenance projects. The projects listed below represent needs that are critical to maintaining the integrity of the specific facilities. This list is subject to change as projects become more defined and if other needs become evident. For example, it may be possible that facilities have unseen damage. Actual allocation of funds to particular projects will depend on a determination of current need priorities at the time that funds become available.

Background

In the summer of 2001, the Department undertook and completed a comprehensive series of building condition audits for all of its State-owned facilities. The original building condition audits, completed in 1998, were outdated. The Department has used the updated information to prioritize the Department's list of deferred maintenance needs.

When deferred maintenance needs are met, additional annual investment will be required to keep up with normal repair and maintenance needs, or the deferred maintenance backlog will continue to grow. The estimated future funds needed for normal repair and maintenance are listed for FY2007 through FY2009. The funding level to keep up with repair, renewal and replacement needs (above and beyond ordinary day-to-day maintenance) was estimated by using standard formulas that are based on the cost of replacing a building. One formula assumes a constant proportion of annual maintenance costs over the life cycle and is derived as a percentage (1.5%) of building replacement costs; the other, widely-used, Sherman-Dergis method, attributes greater costs to older buildings (= Replacement Cost x 0.75 x (Age of Building/1275)). The Alaska Psychiatric Hospital has not been included in these formula computations since that facility will soon be replaced.
