This project will include an extension or relocation of the existing 2,720' X 75' gravel runway to 3,280' X 75'; resurfacing of the runway, existing taxiway and parking apron; and expansion of the associated safety areas. In conjunction with the initial airport scoping and airport layout plan process, the runway, apron, and taxiway will be designed for a future non-precision global positioning system approach which may necessitate modifications to the geometry and layout of these facilities. The project also includes replacement of culverts and installation of thaw wires, and installation of medium intensity runway lighting.
