Project Description/Justification:
The objective of this program is to increase the amount of revenue available for highway programs by using increasing motor fuel tax compliance. The scope is to implement automated tests to analyze and compare tax returns filed; contact taxpayers to resolve potential compliance issuse; perform analysis and audits as required to confirm taxpayer information on both interstate and international fuel imports. For the coming fiscal year, we plan to perform additional refund claim audits and to increase our compliance work through data-matching of imported fuel with reports from the Homeland Security Administration.
