Additional Information / Prior Funding History:

FY1999 - \$4,200,000.

Project Description/Justification:

Complete construction of relocated airport now that earthen embankments constructed in 2000-2001 have compacted. Landing guidance aids and airport lighting will improve operations and safety during daylight operations and during hours of limited visibility and darkness. A Snow Removal Equipment Building will protect state equipment from weather deterioration. The old runway, apron and taxiway did not meet state standards for a community class airport, did not have a runway safety area, did not meet current dimensional requirements, flooded annually, and had vehicles crossing the runway.
