Additional Information / Prior Funding History:

The court system received \$1,578,000 in capital budget appropriations over three budget years for deferred maintenance, as well as \$250,000 through an interagency transfer from the Department of Administration.

Project Description/Justification:

This request for \$2,975,000 over four additional budget years is to eliminate the deferred maintenance backlog that accumulated due to insufficient maintenance funding for state owned facilities. The following project list (less the projects completed with funds previously appropriated) was contained in the Legislature's Deferred Maintenance Task Force report as well as previous session bills HB316/SB228. This request continues to be included in the Capital Improvement Plan since no other provision has been made to correct these deficiencies.

Annual funding amounts are determined according to the urgency associated with building failure if the repairs are not funded; e.g., roof failure can result in failure of many other structural components. All projects in a location are listed together for simplification. The facilities are in priority order.
