1007 I/A Rcpts	38.5	Increment to bud Pioneer Homes p		9			0	J ,					

In FY04 the Division of Public Assistance initiated a series of cost saving measures to reduce the upward trend in Interim Assistance costs. These cost saving strategies lowered Interim Assistance costs in FY04 to \$4,300.0 compared to \$4,700.0 for FY03. In FY05, APA increases in Interim Assistance are projected to be reduced from \$4,300.0 to \$3,600.0. The requested increment fully funds the AK Pioneer Homes' portion of the program.

Docitions

been an unqualified success.

As the age of the Pioneer Home resident population increases the cost of the supplies to care for those residents also increases. This is also true for the facilities. As they age, they become more expensive to maintain.

Contractual authorization is available due to the lower census in the homes and therefore a decreased cost of the food service contract.

FY06 is the final year of a 5 year Federal Program to improve the FAS System in Alaska. General Funds are being requested to fund 2 key components of the FAS Program.

The first part of this increment (\$596.0) is requested to continue providing Fetal Alcohol Spectrum Disorder (FASD) diagnostic services in Alaska. These services are currently provided by diagnostic teams. FASD Diagnostic reporting estimates the cost of analysis and diagnosis to be approximately \$4.8 per diagnosis. No more than \$1.1 of the cost is reimbursable by Medicaid. The requested increment will cover the \$3.7 per diagnosis of non-reimbursable costs and will allow the division to continue to fund diagnostic teams to provide this needed service. During FY04 approximately 160 diagnoses were performed in Alaska.

Funding of teams could either continue as grant awards or the division could develop a per diagnosis performance contract. By continuing to fund the diagnostic teams the division continues to provide a much needed service, it initiates overall improved services for the individual and family, and it continues to collect quality FASD diagnostic data that provides increased insight into gaps in service, prevention strategies, and ongoing prevalence data to document outcomes and improvements in the overall state rates.

The second part of this increment (\$500.0) will fund Community Based Prevention and Service Improvement. Currently the Division of Behavioral Health's (DBH) Office of Fetal Alcohol Syndrome (FAS) is funding 40 community-based FAS Innovative grant programs across the state. The amount ranges from \$9.0 to \$150.0 per grant. As we continue the momentum developed with the federally funded Alaska FAS Project, it is important to increase our service delivery capacities to provide improved services to those individuals affected by an Fetal Alcohol Spectrum Disorder (FASD), diagnosed with an FASD or exhibiting behaviors similar to those associated with prenatal exposure to alcohol. Through this increment we will fund up to 10 community-based FASD improved services programs focusing on interventions and services such as respite care, case management, mental health services, substance abuse services, job training/vocational rehabilitation and services to work with women at risk for giving birth to a child with an FASD.

We will focus on developing programs with clear outcomes, evidence-based research and promising programs, as identified by the federal Substance Abuse and Mental Health Services Administration (SAMHSA). These programs will be encouraged to develop within existing service delivery systems such as child protective services, juvenile justice, community mental health centers, residential treatment programs, job training centers, schools, substance abuse treatment programs, etc. providing for long-term sustainability. Programs will be selected to represent regional, cultural, ethnic and discipline diversity.

In an effort to consolidate personal services into a single component, the Division is transferring the following 10 positions to the BH Admin Component. Previously, 6 of these positions were deleted in the Governor's Amended budget. The legislature restored the positions and the department decided to restore 3 more positions subject to collection of adequate receipts to support them. PCN 06-0386 was retained in the FY05 Governor's Amended budget. This transfer consolidates personal services into the BH Administration component in order to accomplish greater administrative efficiency.

This funding would establish regional community mental health care teams with individualized funding pools to implement care coordination and gatekeeping for the Bring the Kids Home program.

There has been a steady increase in the number of custody and non-custody children and youth placed in out of state residential psychiatric treatment centers. In FY04 it was estimated that 733 children ranging in age from six to seventeen will be served out of state. The Child and Adolescent Needs Assessment revealed that Alaska Native children represent 49% of the population of children in custody and 22% of the non-custody children sent to out-of-state placements. Frequently out-of-state treatment is not as therapeutically beneficial to the children and their families as services delivered close to home.

The long-term goals of the Alaska Mental Health Trust Authority Bring the Kids Home proposal are consistent with those of the Alaska Community Mental Health Services Association; these agencies work collaboratively with the Division of Behavioral Health to bring to bear the collective experience and expertise of member agencies to the achievement of these goals. The Bring the Kids Home proposal has been broken into phases and strategies which can lead to significant improvements in the system of care for children and youth and work towards meeting the long-term goals of the program.

Assessment and Care Coordination is the process for determining the level of care for both custody and non-custody children. The objectives are to divert children from avoidable and unneccessary out of state residential psychiatric teatment placements by linking families and children with alternative community-based care or other in-state services, and facilitating patient progress toward treatment objectives with an emphasis on discharge planning. Regional community mental health care teams will be formed and composed of state agency representatives, community behavioral health providers (1 Native and 1 non-Native), the individual service provider already treating the child/family, the child and the parents/legal guardians.

In addition to assessing the level of need for specific children, the team will be involved in making the determination as to the specific residential treatment center program that best meets a child's unique treatment needs. This will provide authority to the team to place children in facilities that are responsive to working with local providers in case coordination and discharge planning.

Case coordination is another function of the team. With their knowledge of the individual child and family's unique needs, and familiarity with local community resources, the local mental health rehabilitation agencies are best suited to providing this function.

Leadership Initiatives to K	eep Children												
Alcohol-Free													

1007 I/A Rcpts 500.0

This increment funds training and leadership via community grants to organizations to partner with the state in a campaign to increase public awareness of the issues surrounding underage alcohol consumption. Research reveals that early alcohol use can have serious adverse consequences for mental, physical, and social development that may persist into adulthood. Studies show that 40% of individuals who begin drinking alcohol before age 13 will manifest alcohol abuse or dependence at some point in their lives. Most recent studies indicate that alcohol may actually impair cognitive functioning in young users, causing them to remember 10% less of what they learn than their non-drinking peers. Early alcohol use is often associated with poor school performance, depression, and suicide; criminal and violent behavior; and risk-taking that can lead to injuries and death as well as early sexual activity, with exposure to sexually transmitted diseases and unplanned teen pregnancies. The four goals for the leadership initiatives are:

- 1) Educate the public about the incidence and impact of early alcohol use by children between 9 and 15 years of age;
- 2) Energize the public to address these issues within their families, schools, and communities in a sustained way that seeks to elicit change;
- 3) Focus the attention of State and National policymakers and opinion leaders on the seriousness of the early onset of alcohol use;
- 4) Make prevention of alcohol use by children a national priority.

Educating the public and youths to the known dangers of early alcohol use, and utilizing youths as leaders and mentors among their peers will bring focus to youths on making healthy life choices.

This program is a national model developed by the Leadership to Keep Children Alcohol Free that also utilizes First Ladies to serve as leaders and spokespersons. Mrs. Murkowski has agreed to participate on behalf of Alaska.

The I/A receipts for this increment will be funded by TANF as part of the FFY03 High Performance Bonus awarded to the State in the Division of Public Assistance.

1007 I/A Rcpts 500.0

Utilizing materials developed for this national model by the Leadership to Keep Children Alcohol Free organization, funds will be used to obtain a variety of educational materials using a wide range of technology. The programs will focus on a school-based educational approach with trained staff providing information and developing an ongoing dialogue with 11-12 year olds about alcohol and drugs. Programs will also include materials for youths to take home to continue the discussion with their parents/caregivers. Examples of the types of materials available include webcasts that will be streamed digitally to watch events, teleconference seminars, and lectures; web chats to find out what's going on and discuss transcripts; electronic books; powerpoint presentations; and talking books. All materials are modified to the grade-level being taught and are deemed age appropriate.

Data on the onset of alcohol use at very young ages are compelling and demonstrate the need for prevention campaigns such as these. More than one-fifth of 8th-graders and 42% of 10th graders have been drunk at least once; twice as many 8th-graders consume alcohol as use illegal drugs, approximately 64% more 8th-graders drink than smoke; almost one-fourth of 9th-graders binge drink, among 9th-graders girls consume alcohol and binge drink at rates almost equal to those of boys. Using school-based educational approach, students will learn about the damaging effects of alcohol use.

The I/A receipts for this increment will be funded by TANF as part of the FFY03 High Performance Bonus awarded to the State in the Division of Public Assistance.

Rural Services for Deaf/Hearing Impaired <\$75.0> Family Wellness Camps <\$100.0> Traumatic Brain Injury Project \$50.0 Improve Capacity to Employ Involuntary Commitment \$75.0 Provide Detox Alternatives \$405.0

There are two new Mental Health Trust projects for FY06:

Improve Capacity to Employ Involuntary Commitment \$75.0 - This increment would provide funding to develop specialized capacity in Community Residential Centers (CRC's or "halfway houses") to provide non-jail therapeutic alternatives for pre-trial release, sentencing disposition, and community re-entry for beneficiaries being discharged from prisons.

Provide Detoxification Alternatives \$405.0 - This increment provides funding to develop a mechanism to support commitment to treatment of persons whose abuse/addiction repeatedly place their health and safety at risk.

1092 MHTAAR	-29.0	This decrement in	n MHTAAR fu	unding reflects	adjustments	to the following	Mental Hea	Ith projects:					

Integrated Support-Co-occurring Disorders <\$529.0> Consumer Directed Programs and Clubhouses <\$200.0> Rent Subsidy:Replicate "Bridge" funding model \$250.0 Housing Retention Support Services \$250.0 Incentive Grants (Housing for Beneficiaries) \$200.0

The Mental Health Trust has provided funding for three new projects in FY06:

Rent Subsidy: Replicate "Bridge" Funding Model \$250.0 - The Mental Health Trust has provided funding to replicate the State of Hawaii's "Bridge" model. This model provides a mechanism of funding to assist beneficiaries immediately following discharge from an institutional setting for up to two years while on the Home Choice voucher waitlist, Social Security benefits, or securing other long term supports.

Housing Retention Support Services \$250.0 - This increment provides funding for ongoing support to maintain the success of beneficiaries in community housing settings. Projects included in this activity include: Special Needs Housing Grants, Transitional Housing for Substance Abuse Project, Trust Beneficiary Single Room Occupancy providers.

Incentive Grants (Housing for Beneficiaries) \$200.0 - This increment is designed to increase targeted Housing Assistance Program (HAP) grants and to provide incentive grants to serve high needs beneficiary populations, including: outreach to street populations, chronic public inebriates, corrections felons and potentially violent parolees.

Bring The Kids Home (BTKH) is an initiative to return children with severe emotional disturbances from behavioral health care in out-of-state residential facilities to in-state or community-based care. It will reinvest funding that currently provides expensive distant care to in-state services and capacity development to serve children closer to home, keep families more involved and intact, and more effectively carry out transitions and discharges.

Funding for existing services has often been inadequate and has led to the lack of a fully implemented continuum of care in Alaska. With financial support, this initiative will focus on successfully building upon the existing infrastructure. This approach is intended to assist in the development of expanding existing programs to treat children and youth in their own community or in-state.

There has been a steady increase in the number of custody and non-custody children and youth placed in out of state residential psychiatric treatment centers. In FY04 the division estimated that 733 children ranging in ages from six to seventeen were served out of state. The Child and Adolescent Needs and Strengths Assessment revealed that Alaska Native children represent 49% of the population of children in custody and 22% of the non-custody children sent to out of state placements. Frequently out of state treatment is not as therapeutically beneficial to children and their families as services delivered close to home.

The Bring The Kids Home initiative has three major long term goals:

- 1) To build/develop and sustain the community-based and residential capacity to serve children with all intensities of need within the service delivery system in Alaska.
- 2) To develop an integrated seamless service system in Alaska that will allow children and youth to be served in the most culturally competent, least restrictive setting, closest to home as determined to be safe and appropriate.
- 3) Significantly reduce the existing numbers of children and youth in out of state care and gate-keep ensuring that the future use of out of state facilities is kept to a minimum.

In FY 06 the the following strategies will be funded to support this initiative:

1) Development and/or enhancement of family group homes, group homes with 24/7 staff, OSLC multi-dimensional homes and crisis/nursery homes. These homes will provide a consistent level of care that is not fully attainable in a residential home staffed with shift workers. 24/7 homes that do not use shift-worker models are approximately 20% less costly (\$1,067.0)

The federal Child and Family Services Review (CFSR) completed in September of 2002, highlighted inadequacies within the Office of Children's Services (OCS) in ensuring the safety of children, finding children permanent homes and making sure their health, education and mental health needs are met. Many of the areas identified as needing improvement were attributed to high caseloads.

In order to keep children safe, recruit more resource families to provide foster/adoptive homes, meet the outcomes defined in the federal program improvement plan, and enhance safety in foster/adoptive homes, the Office of Children's Services requests 31 additional positions in FY06 to respond to growth in caseload and assign front-line workers to prevention, protection and permanency.

Ten positions will be assigned to perform home studies of foster homes and adoptive homes. Two positions will be assigned to supervise home study workers. Three positions will be assigned to enhance ongoing efforts to recruit and retain foster families. Eleven positions will be assigned to perform intake, investigation, follow-up and ongoing case management to respond to growing caseload and more timely follow-up with more regularity. Finally, five positions will be assigned full time to serve as business analysts/expert resources/data processing liaisons to all the users of the recently-implemented ORCA computer system.

Additional travel and contractual funds (for vehicle leases) are requested in FY06 to perform home visits and site visits in order to satisfy programmatic quality assurance goals of the federal program improvement plan.

To enhance staff retention, OCS will begin to pay licensing fees to ensure licensure credentials are current for front-line workers, supervisors, and management staff. Many front-line workers are not renewing their social worker licenses because of increases in licensing fees (currently \$500 per license for a two-year period). This will allow for the renewal of an estimated 250 licenses per year.

Office renovation involving, moving, and wiring is required in order to co-locate and consolidate existing and new staff to the extent possible in Anchorage and Fairbanks.

Increased costs for the positions and support costs are being partially offset by a fund change built into the calculation of fund sources for this increment. GF has been reduced by 900.0 and federal increased by 900.0 to reflect anticipated increased Title IVE collection.

1004 Gen Fund 270.6

This increment will provide funding to three or more grantees delivering family preservation services in rural areas. Provision of these services in FY06 is required under the program improvement plan (PIP) prescribed by the cognizant federal agency. OCS must be in compliance by FY2007.

In FY05, the department anticipated that some grantees would be able to partially absorb a GF cut in this component by billing Medicaid for some services formerly supported with funds from a grant award. Medicaid revenues in FY05 cannot be earned because targeted case management (TCM) under Medicaid was not approved for Alaska. TCM plans have not been approved for many states this past year.

Federal awards for Child Abuse Prevention and Training Act/Children's Justice Act (CAPTA/CJA) will double beginning October 2005. DHSS will grant to subawardees to enhance ongoing advocacy/justice activities. The following services are provided through these grants:

Child-Appropriate/Child-Friendly Facility: A children's advocacy center provides a comfortable, private, child-friendly setting that is both physically and psychologically safe for clients.

Multidisciplinary Team (MDT): A multidisciplinary team for response to child abuse allegations includes representation from the following: law enforcement; child protective services; prosecution; mental health; medical; victim advocacy; children's advocacy center.

Forensic Interviews: Forensic interviews are conducted in a manner which is of a neutral, fact-finding nature, and coordinated to avoid duplicative interviewing.

Medical Evaluation: Specialized medical evaluation and treatment are to be made available to CAC clients as part of the team response, either at the CAC or through coordination and referral with other specialized medical providers.

Therapeutic Intervention: Specialized mental health services are to be made available as part of the team response, either at the CAC or through coordination and referral with other appropriate treatment providers.

Victim Support/Advocacy: Victim support and advocacy are to be made available as part of the team response, either at the CAC or through coordination with other providers, throughout the investigation and subsequent legal proceedings.

Case Review: Team discussion and information sharing regarding the investigation, case status and services needed by the child and family are to occur on a routine basis.

Case Tracking: CACs must develop and implement a system for monitoring case progress and tracking case outcomes for team components.

The Department requests an increment of \$1,578.7 (560.4 Federal Receipts, \$1,018.3 General Fund) to cover the cost of a projected 8% growth in the Subsidized Adoption & Guardianship Program. This increment is necessary to ensure continuity of subsidy payments and continued success of the subsidy program.

**Positions** 

The Subsidized Adoption & Guardianship budget and FY2006 increment request is based on projected caseloads. The following table shows the number of children in the Subsidized Adoption & Guardianship program from FY1992 to FY2006 (FY2005 and FY2006 are projected). At the close of FY2004, there were 2,098 children in the Subsidized Adoption & Guardianship program. The Department anticipates the number of children receiving these benefits to increase to 2,216 in FY2005, with an additional 8% growth to 2,393 in FY2006.

Fiscal Year	Number of Clients
FY1992	338
FY1993	450
FY1994	605
FY1995	696
FY1996	775
FY1997	847
FY1998	1,017
FY1999	1,169
FY2000	1,332
FY2001	1,515
FY2002	1,800
FY2003	1,918
FY2004	2,098
FY2005 (Projecte	ed) 2,216
FY2006 (Projecte	ed) 2,393

Several factors have contributed to the success and growth of the Subsidized Adoption & Guardianship program. Federal and State policies, including Alaska's HB 375 (Chapter 99, SLA 98) pertaining to children in need of aid, and the Federal Adoption and Safe Families Act of 1998, mandate the Department to continue the increased emphasis on permanency planning and to move quickly to find permanent homes for children in State custody. AS 25.23.190 further stipulates that "A hard-to-place child in the permanent custody of the department in a foster home for not less than one year may not be denied the opportunity for a permanent home if the achievement of this depends on continued subsidy by the state."

A child must have special needs in order to qualify for the Subsidized Adoption and Guardianship program. Special needs

categories include physical or mental disabilities, emotional disturbance, recognized high risk of physical or mental disease, age, membership in a sibling group, racial or ethnic factors, or any combination of these conditions.

The Subsidized Adoption & Guardianship program provides the State with a cost-effective alternative to foster care. State law stipulates that adoption and guardianship subsidy payments may not exceed what would have been paid had the child remained in foster care. In FY2004 the average daily cost per child for the Subsidized Adoption & Guardianship program was \$23.45, compared to an average daily cost of \$26.83 for children in foster care (includes the Foster Care Base Rate and Foster Care Special Needs programs). In addition, in FY2004 approximately 32% of the children in foster care had extra-ordinary on-going needs and received a rate augmentation, which averaged \$16.52 per day. There are also indirect cost savings for Subsidized Adoption & Guardianship cases as typically these children are not carried as part of the Office of Children's Services social worker caseloads.

If this increment is not funded, the Department will be unable to meet its obligation to pay monthly subsidies. In addition, failure to move children to adoption or guardianship will result in violation of the Federal Adoption and Safe Families Act, Alaska's HB 375 (Chapter 99, SLA 98), and AS 25.23.190 (see cite above). Lack of payment would also pose a serious financial hardship on many of the guardians and adoptive families and would potentially subject the State to legal action for breach of contract.

In the FY2005 budget the Department proposed an aggressive package of cost containment proposals to reduce Medicaid costs. For the Health Care Services Medicaid Program the total reduction was estimated at \$41.5 million, including \$18.4 million in general funds.

The Department is requesting an increment of \$19.7 million, including \$9.3 million in general funds, to restore funding to the base budget for those areas of cost containment that are not anticipated to be attainable at this time. However, it should be noted that the department continues to consistently work towards containing costs of Medicaid wherever possible.

Progress has been made towards implementation of many of these proposals despite delays, political and industry push-back, administrative difficulties, provider complaints, etc. that have hindered implementation and subsequently reduced the original estimate of cost savings. Additionally, the current Medicaid Management Information System (MMIS) has limitations that have delayed system changes until approximately the spring of 2006 when the new information system currently under development can be implemented.

Although, it is difficult to identify the results of cost containment over a short interval of time, the department will continuously track the progress of cost containment implementation and reassess any additional savings or potential shortfalls that may result from this activity.

#### Breakdown of Increment

FY2004 Cost Containment Efforts - 2.704.8 GF

In FY2004, the department proposed various cost containment reductions and in FY05 took a further reduction of the annualized costs for those. Below is a summary of those areas that have been unattainable:

Hospitals - More Flexible Revenue Codes: This project was tabled until all other priority cost containment measures have been implemented since the project would require dedicated resources with relatively minimal savings.

Implementation not only requires review of hospital outpatient and inpatient cost centers in order to develop clear criteria for billing these revenue codes, but 100% prepayment review of hospital claims to ensure accurate billings.

- Separate Psychiatric Rate for Acute Care Hospital Psych Beds: This project was tied to increased bed capacity that was postponed until December of 2006.
- Exclude Home Office Costs from Facility Rates: Regulations have been implemented that result in no cost savings until a rebase of facility rates has been done by the Office of Rate Review, which is not anticipated until 2007. The initiative

depends on facility reports that were not required under old regulations and therefore the State has no authority to make this change until the next rebase.

#### Pharmacy:

- Cost Avoid Rather Than Pay And Chase Third Party Liability Recoveries. The current Medicaid Management Information System (MMIS) system has limitations that make it impossible to implement this project until the new information system currently under development can be implemented (in approximately spring of 2006).
- Reduce Pharmacy Dispensing Fee -
- Decrease % of AWP for Brand Name Drugs -
- Decrease % of AWP for Generic Drugs and State Maximum Acquisition Costs -

These projects were tabled to focus on building collaboration for the PDL project which was anticipated to have greater cost savings potential.

#### Physicians:

- Reduce Physician Payment Schedule After regulations were drafted, the decision was made not to implement in order to focus on building collaboration for the PDL project.
- Increase Co-Payments: This project was tabled because it required more staff resources than the anticipated savings potential.

Administration - New Reconsideration Process - This project was deemed impossible to accomplish by Department of Law findings that it did not comply with the Administrative Procedures Act.

#### Unattainable FY2005 Cost Containment Proposals

Cost avoid Medicare Covered Drugs: \$521.0 GF, \$879.0 Federal. The original estimate of \$2.7 million, including \$1 million in general funds, savings has not been achievable. The decision was made to implement cost avoidance for Medicare covered drugs along with the broader project of implementing cost avoidance for all pharmacy services. Implementation of cost avoidance for all pharmacy services required regulatory and MMIS system changes, which has resulted in some delay to realizing savings. The required regulation changes have already been put out for public notice and cost avoidance for all pharmacy services is scheduled for early calendar year 2005, six months into FY05.

Expand Case Management of high cost recipients: \$720.0 GF; \$1,080.0 FFP. There are currently 37 lock-in cases which require case management for high cost recipients. However, providers are hesitant to build practices on lock-in cases, since all recipients have appealed lock-in status.

#### **Department of Health and Social Services**

RDU: Health Care Services (485)

			Personal			Capital	Grants &	Debt	i osition	3
Change Record Title	Trans Type	Totals	Services	Travel	Services Commodities	Outlay	Benefits	Service	PFT PPT	NP

Expand effort to identify Drug Abuse: \$459.0 GF; \$741 FFP. The original estimate for this item was \$760.0 GF and \$1,140.0 FFP. The expanded effort to identify Drug Abuse requires expanded prior authorizations for certain classes of drugs. The implementation of this project is being done by specific drug class in conjunction with expanding the PDL for those classes of drugs.

Expand Preferred Drug List: 4,464.9 GF, 7,327.4 FFP. The original estimate for these proposals was \$8,076.9 GF and \$12,115.4 FFP. This project was delayed by 2 to 3 months due to PHARMA's interest in trying to stop these types of state projects. Additionally, Alaska is one of a handful of states which has broken new ground with a multi-state supplemental drug rebate pool, which was delayed for 5 months by Centers for Medicare and Medicaid Services (CMS), further delaying implementation. As this supplemental rebate pool attracts additional states (there are now 8 participating states), savings will increase.

Implementation was also delayed in order to maintain cooperation from Pharmacy providers and Physician groups. As a result, a phased approach to determining and adding specific drug classes became the preferred method of implementing and expanding the PDL.

Approximately one-third of the estimated PDL savings is attached to behavioral health drugs, one of the last drug classes phases to be implemented.

Implement Prior Authorization requirement for Outpatient visits: \$147.3 GF; \$220.9 FFP. Expansion of case management and prior authorization programs have been delayed to allow division resources to be used on other priority projects such as: development and implementation of a new MMIS, Medicare Part D, Senior and Disability Services payment projects, PERM, school based services, Bring the Kids Home, and the State Travel Office.

Eliminate Duplicative services: \$17.6 GF; \$29.9 FFP. This estimate has been reduced by half from the original request. This project to enhance claim check editing to include a variety of provider types was scaled back due to span date billing instead of single date of service billing for many provider types. Implementation is still anticipated for September 2005 at this time.

Implement Prior Authorization for Physical Therapy: \$160.9 GF; \$241.3 FFP. Implement Prior Authorization for Occupational Therapy: \$32.5 GF; \$48.5 FFP.

More in-depth research and analysis of estimated costs savings determined that implementing these projects would, in fact, increase costs rather than save.

Docitions

Rate Setting: \$229.0 GF

Regulation changes include clarification of allowable inflation factors, a revision of the base year for facility rates from 12 to 24 months, and clarification of costs that can be included in determining facility rates. There are three regulation components for the clarification of costs.

Other savings through implemented cost containment measures not budgeted:

Control Durable Medicaid Expenditure supply costs - Implementation results in \$135.6 GF and \$179.7 federal savings that originally were not anticipated in the FY05 budget and reduces the net incremental need for FY06.

**RDU:** Health Care Services (485)

Change Record Title	Trans Type	Totals	Personal Services	Travel	Services Commodities		Capital Outlay	Grants & Benefits	Debt Service	PFT	PPT	NP
Federal Medicare Part A & B Premium Cost Increase	Inc	46.1	0.0	0.0	0.0	0.0	0.0	46.1	0.0	0	0	0
1002 Fed Ropts -4 1	Medicaid-eligible	nersons tha	t are over the a	age of 65, or	disabled and on	Sunnlemen	tal Security I	ncome or in t	he final			

1002 Fed Rcpts -4.1 1003 G/F Match 50.2 Medicaid-eligible persons that are over the age of 65, or disabled and on Supplemental Security Income, or in the final stages of a renal disease are also eligible for Medicare. This provides the opportunity for Medicaid/Medicare "cross-over" claiming: Medicare pays 80 percent of a cost-certain (capped amount) for each type of service provided to eligible individuals; Medicaid pays the remaining 20 percent plus the premium for the health care coverage received by each individual. For example, a Medicare eligible client may be billed \$1,000 for hospital services provided. Medicare will cover a cost-certain of \$800 for those services at 80 percent, or \$640. Medicaid then pays the remaining \$160, plus the individual's premium (anywhere from \$5 to \$100 depending upon the individual plan). The result of these "cross-over" claims is an overall savings to Medicaid though the savings amount is difficult to measure in the aggregate.

On September 3, 2004, the U.S. Department of Health and Human Services announced the Medicare premium deductible and coinsurance amounts to be paid by Medicare recipients in 2005. These premiums and deductibles reflect general growth in health care costs. Medicare Part A rates increased by 4.1 percent and Part B rates increased by about 17.4 percent. These percentages have been applied to FY04 actual numbers with an estimated 2 percent increase added for growth. The reduction in federal fund authority required is the result of the lower federal medical assistance pecentage.

Estimated Medicare Part D Adjustment	O Clawback	Inc	5,301.0	0.0	0.0	0.0	0.0	0.0	5,301.0	0.0	0	0	0	
1003 G/F Match	5,301.0	The Medicare Pro	escription Dr	ua Improvemen	t and Moderr	nization Act of 2	003 creates	a new Medio	care Part D pre	escription				

The Medicare Prescription Drug Improvement and Modernization Act of 2003 creates a new Medicare Part D prescription drug benefit available to all Medicare recipients, effective January 1, 2006. Medicare recipients who qualify for Medicaid will no longer be eligible to receive prescription drug coverage through Medicaid.

States' direct spending on drugs for dual eligibles will decrease, but savings are offset by the states' phased-down contribution (also known as the "clawback"), a provision of the new law requiring states to pay the federal government according to a formula intended to estimate those savings. States will be required to pay 90 percent of the estimated savings in the first year, phasing down to 75 percent in 10 years.

The formula uses gross Medicaid expenditures for prescription drugs in 2003, inflated forward using a national inflation factor for prescription drugs, rather than individual state Medicaid drug inflation. This rate may be higher than the rate experience by an individual state. States, including Alaska, have taken aggressive measures to reduce prescription drug spending since 2003. We have used a prescription drug list (PDL) to achieve savings that are not reflected in 2003 spending.

The state's general fund share of savings is computed by the Centers for Medicaid and Medicare using its current FMAP rate. No adjustment is made for prescription drugs provided by tribal pharmacies, for which we receive 100 percent federal reimbursement. This will overestimate Alaska's savings resulting in a higher payback for Alaska.

Some cost containment measures, such as PDL, take advantage of volume purchasing to achieve their savings. As states experience a significant reduction in the amount of prescription drugs they are purchasing, they may find that the net price available through a PDL, or other volume discount arrangement, increases for the drugs they continue to purchase. No adjustment is made for this impact on drug pricing in the savings estimate.

The department estimates the FY06 phase down payment for Alaska to be \$5.3 million (after adjusted by the estimated 10% savings). This reflects a six month period beginning January 1, 2006. This is only an estimate based on specific federal requirements that were known at the time of budget development. Federal requirements still to be determined include listed drugs that will be excluded from Part D reimbursement.

This request adds positions to provide increased oversight of the state's Medicaid Program in compliance with legislative and federal directive and mandate. The Division of Health Care Services (HCS) has been tasked with implementing more controls over costs, quality health care assurance, fraud and abuse, and general administration of the Medicaid program and the Medicaid Management Information System (MMIS).

Currently, Medicaid has only one qualified medical nurse on staff. The HCS needs to rebuild its workforce in line with current management requirements as follows:

Nurse Consultant II - Practioner Relations to provide high-level medical/clinical consultation working directly with Medical providers and to make informed clinical decisions related to appeals.

Nurse Consultant II - Facility Relations to provide high-level medical/clinical consultation working directly with Medical facilities and to make clinical decisions related to their appeals. This position will also manage the clinical Qualis contract.

Nurse Consultant I - Pharmacy & Ancillary to provide high-level medical/clinical consultation work on pharmaceutical, durable medical equipment, audiology, home health, hospice, and other ancillary medical services.

Nurse Consultant I - Recipient Services to provide high-level medical/clinical consultation work related to recipient services such as Early Periodic Screening Diagnosis and Treatment (EPSDT), appeal decisions, and lock-in recipients.

Health Care Services administratively and operationally manages Medicaid's fiscal agent contract. Contract funding exceeds \$13 million annually and was previously managed by the Executive Director of the Medicaid Rate Advisory Committee, which is now defunct. The HCS had absorbed these responsibilities, but can no longer support this contract adequately without dedicated staff. Request is as follows:

Medical Assistance Administrator IV - Operations & Contract Manager will oversee the operational aspects of the First Health contract working closely with the Commissioner's office Financial Management Unit to assure contract management is completed at all levels.

Research Analyst IV - Supervise Research Unit - HCS provides research and analysis for the public, private providers and recipients, and the legislature and federal and state government agencies. Under the reorganization, research demands have increased as each DHSS Medicaid divisions' management needs must be met. In addition, the decrease in staff in the Juneau Office is expected to place greater demands on the Anchorage research unit. This unit is currently supervised by the division's MMIS and Decision Support Unit manager who has been tasked with additional duties under the reorganization when staff was tranferred to support the newly developed Medicaid divisions. The result has been an State of Alaska

increased distribution of work on a unit that gained no positions. This research analyst request will enhance the unit's ability to respond to requests for information from all sources and alleviate the inequitable work load placed on the unit manager:

Program Manager position is added to manage the MMIS project to keep project on track to meet implementation deadline.

The HCS Anchorage office will lose seven available support staff when the Maternal and Child Health group is transferred to the Division of Public Health and will give up an Administrative Assistant and the Director's Secretary in Juneau in FY06. Not all of these staff have provided support to the Medicaid unit in Anchorage, but at least three have provided part time assistance. This request brings an Admistrative Clerk II on board to support Medicaid operations in the HCS Anchorage office.

		Centers for Medi	care and Me	dicaid Services	(CMS) issu	ed proposed reç	gulations tha	t require stat	es to sample	payments			

Centers for Medicare and Medicaid Services (CMS) issued proposed regulations that require states to sample payments on Medicaid claims. CMS issued these regulations to meet requirements in the Improper Payments Act (IMPA) passed by congress. CMS makes these regulations effective October 1, 2005. The regulations mandate a quality control review of payments to medical providers, including a review of the eligibility criteria, medical necessity, and correctness of the payment. The proposed requirements assume a 50% error rate for all states, and CMS wrote the sampling requirements to ensure each state would draw approximately the same number of claims in an annual sample. This creates a statistically valid National Sample, and an inordinately large sample size for Alaska.

This change record adds the following to the component:

(06-#151)--1 non-perm, on-call for Juvenile Justice Officer position(s). This one PCN has been requested to consolidate the following on-call non-perm positions at MYC: 063496S, 063497S, 063498S, 063501S, 063503S, 063504S, 063513S, 063520S, 063529S, 063532S, 063534S, 063535S, 063537S, 06-3558S, 063560S. The PCN assigned effective 8/16/04 is 06-N073.

(06-#190 and 06-#191)--2 non-perm on-call subfill Maintenance General Journey positions (063588S, 063589S)

The non-perm, on-call positions have not previously been budgeted. Because we are budgeting them now (along with premium pay), this component will carry a vacancy factor.

(06-#152)--1 full-time Mental Health Clinician position for the component. Continuing increase in severity and number of mental health needs for facility youth warrant the creation of this mental health position. The position will provide direct clinical services to youth; crisis intervention; perform court-ordered evaluations; provide mental health staff training and consultation.

(06-#153, 06-#154, 06-#155) 3 full-time Juvenile Justice Officer positions to extend the McLaughlin Youth Center Community Detention program within this component. The program will be extended to include evenings until 8:00 p.m. and weekends (12:00 p.m. until 8:00 p.m.), thereby providing important evening and weekend programming not currently provided. Also, research demonstrates the importance of services being provided these hours. In addition, these position will help to maintain the community work service program for probationers.

The additional funds are needed on the 71000 line to cover costs for the anticipated mental health clinician position and the three Juvenile Justice Officer positions. Continuing increase in severity and number of mental health needs for facility youth warrant the creation of this mental health position. The position will provide direct clinical services to youth; crisis intervention; perform court-ordered evaluations; provide mental health staff training and consultation. The Juvenile Justice Officer positions are needed to expand the McLaughlin Youth Center Community Detention program to include evenings until 8:00 p.m. and weekends (12:00 p.m. until 8:00 p.m.), thereby providing important evening and weekend programming not currently provided. Also, research demonstrates the importance of services being provided during these hours. In addition these positions will help to maintain the community work service program for probationers.

These positions are part of the system reinvestment plan approved by the Commissioner on 8/2/04.

There are various reasons there are funds available in the grants line. In FY2004, we saw lower population counts at the facility. This trend is expected to continue. Many of the medical, dental, psychological, etc., services provided to youth were paid from this line item. Funds are needed in the personal service line to help fund the new positions that are being requested as the division shifts to a more community based level of services to rehabilitate juvenile offenders.

Additional funding is needed in the 71000 line in order to meet the operational needs of this component. For the first time, we are budgeting for non-perms and premium pay within each of the facility components. There are various reasons there are funds available in the grants line. In FY2004, we saw lower population counts at the facility. This trend is expected to continue. Many of the medical, dental, psychological, etc., services provided to youth were paid from this line item. In addition, refinancing of certain levels of service generates additional savings.

1108 Stat Desig 12.	Transfer in \$12.				chool District for		Borough, Co	mmunities in S	chools.			

This is offset by a change record within the Probation Service component.

The Division of Juvenile Justice (DJJ) and Communities in Schools, Mat-Su (CIS Mat-Su), and the Mat-Su Borough School District (MSBSD) have cooperatively progressed toward their shared vision and mutual goal of providing at-risk youth with a continuum of services from institutional placement to full community-school reintegration.

During the 2001-02 school year MSBSD, DJJ and Communities in Schools-Alaska jointly developed a program called the Alternative Special Education network. This program has served to fill a necessary component in the continuum by providing IEP services and general curriculum access to suspended or expelled special education students.

Collaboratively, the aforementioned agencies have enhanced programmatic continuity by extending the Alternative Special Education Network staff into connecting program along the service continuum. They formed, together with their sources of support, the Alaskan Supported Proactive Educational Network (ASPEN).

ASPEN has been fortified for the 2004-2005 school year by the MSBSD providing a part-time school psychologist, DJJ providing a Transition Probation Officer, CIS Mat-Su providing a Program Coordinator.

DJJ is reimbursed by the school district for approximately two days per week of the Transition Probation Officer's expenses. To post these receipts SDPR authority is required in the Mat-Su Component.

This change record adjusts the position count for the Bethel Youth Facility component. This adds:

(06-#147)--one non-perm, on-call Juvenile Justice Officer position (which consolidates the following PCNs: 063917S, 063918S, 063919S, 063920S) The PCN assigned by the Division of Personnel effective 8/16/04 is 06-N069. The non-perm, on-call positions have not previously been budgeted. Because we are budgeting them now (along with premium pay), this component will carry a vacancy factor.

(06-#158)--one full-time Mental Health Clinician. Continuing increase in severity and number of mental health needs for facility youth warrant the creation of this mental health position. The position will provide direct clinical services to youth; crisis intervention; perform court-ordered evaluations; provide mental health staff training and consultation.

#### This change record adds:

(06-#146)--one Juvenile Justice Officer non-perm on-call PCN for the Nome Youth Facility Component. The PCNs being consolidated are: 063682S, 064559S, 064560S, 064561S, 064562S. The PCN being assigned by the Division of Personnel is 06-N068. The non-perm, on-call positions have not previously been budgeted. Because we are budgeting them now (along with premium pay), this component will carry a vacancy factor.

(06-#195)--In addition, the change record accounts for the new Juvenile Justice Unit Supervisor position (06-4920) that was approved on July 7, 2004. The position was established for the Nome Youth Facility to provide staffing support for current and planned program/facility expansion.

Nome Youth Facility Expans bed capacity	sion from 6 to 14	Inc	451.8	438.0	0.0	13.8	0.0	0.0	0.0	0.0	5	1	0

1004 Gen Fund 451.8

Northwest Alaska, including the communities of Kotzebue, Nome, and the surrounding 28 villages, an area the size of Pennsylvania, is served by one small juvenile detention facility, the Nome Youth Facility. The facility staff, along with juvenile probation offices and community partners, are faced with the challenge of providing detention and intervention services for a very large and remote area of the state. Additionally, there is the recognition that intervening/rehabilitating juveniles within the region is far more effective than transferring them to larger institutions outside the community, or outside the state. Additionally, costs for transporting multiple juveniles out of the region are exorbitant and consume excessive staff time.

The Nome Youth Facility is in the process of completing a facility expansion project to increase its rated capacity from 6 to 14 beds. The estimated timeframe for completion of this renovation is late spring 2005. The level of referrals in the Nome region and the seriousness of the type of youth requiring secure detention, coupled with the expansion of the facility from its existing 6 beds to a rated 14 bed capacity necessitates additional staffing in order to adhere to required staffing ratios. The request is the minimum requirement for the facility to ensure basic safety, security and order within the detention facility. The existing permanent staff are insufficient to cover the required shifts needed to keep a 14-bed facility open 24/7.

This request is for an additional 5.5 FTE's, to include one Juvenile Justice Officer III position (86.8), 3 additional line juvenile justice officer staff (\$72.7 x 3), a part-time facility nurse (\$68.4) and an administrative clerk (\$64.7). The staffing request is in alignment with other DJJ facilities and adheres to the Division of Juvenile Justice's established staffing ratios for 24-hour institutions. Total anticipated increment is \$451.8.

The facility has been averaging above capacity for the past two years. Average utilization was 150% of capacity in FY '03 and 137% of capacity in FY '04. If these positions are not funded, additional costs would be accrued through the use of non-permanent positions and there would be a significant increase in overtime costs. The reliance on overtime to fully staff a youth facility is poor management practice and not sustainable in the longer run. Excessive overtime is not cost efficient and also results in undue burden to already overtaxed facility staff often leading to increased safety and security risks for both residents and staff. This would likely result in increased staff turnover and recruitment difficulties in an area of the state where this is already a serious challenge.

This change record adjusts the position count for the Johnson Youth Center for the following:

(06-#144)--1 Non-Perm, On-Call Juvenile Justice Officer. This one PCN consolidates the following PCNs: 063756S, 063758S, 063759S, 063760S, 063786S, 063787S, 064580S, 064581S, 064582S. The PCN assigned by the Division of Personnel effective 8/16/04 is 06-N071.

(06-#159)--1 Non-Perm, On-Call Nurse II (PCN 06-4586S)

The non-perm, on-call positions have not previously been budgeted. Because we are budgeting them now (along with premium pay), this component will carry a vacancy factor.

(06-#145) 1 Full-Time Mental Health Clinician. Continuing increase in severity and number of mental health needs for facility youth warrant the creation of this position. The position will provide direct clinical services to youth; crisis intervention; perform court-ordered evaluations; provide mental health staff training and consultation. This position is part of the FY05 system reinvestment plan approved by the Commissioner on 8/2/04.

Transfer funds to meet anticipated personal service needs within the component. There are various reasons there are funds available in the grants line. In FY2004, we saw lower population counts at the facility. This trend is expected to continue. Many of the medical, dental, psychological, etc., services provided to youth were paid from this line item. In addition, we expect to see savings from refinancing. Funds are needed in the personal service line item because for the first time, non-perm and premium pay is being budgeted within each component. Additional funds to this line item will help fund the non-permanent, on-call position.

The Office of Children's Services (OCS) will be transferring \$50.0 it receives as part of the federal Chaffee Independent Living program to the Division of Juvenile Justice (DJJ). The goal of these federal funds is to support transition for youths aging out of State foster care to enable them to successfully transition to living independently. Because of the way OCS' state plan for these funds is written, DJJ youth have not qualified for these funds. It has now been determined that DJJ youth qualify at the federal level, so the state plan would need to be revised by OCS to include DJJ youth.

Based upon research for the total number of DJJ youth that would qualify for this funding, a transfer of \$50.0 appears to be adequate to cover the needs for DJJ at this time.

The request to move funds from the Youth Courts component to the Probation Services component allows for more flexibility by the division to use these funds to provide other juvenile related services as needed based on data of the client population. These other services may include (but are not limited to) non-secure shelters, other alternate living arrangements, counseling, support or skill development services for both youth and parents, etc. Needs may change from year to year and based on the data that is collected within the division, there may be more of a need in one area than another. Having the funds in the Probation Services component will support the Department's commitment to flexible funding for client populations based on needs that are driven by data.

The Division will continue to track expenditures for Youth Court activities as well as provide data on the number of juveniles seen by the Youth Courts.

#### Function of Youth Courts:

Youth Courts provide early intervention and community based diversion programs to youth who have been referred to Juvenile Probation for misdemeanor charges (only first or second offenses) or to the court for municipal violations.

#### Activities:

- \* Community based training and technical assistance (training offered by state and national trainers)
- \* First and second time misdemeanor cases are diverted from Juvenile Probation
- \* District court diverts iuvenile alcohol and tobacco cases
- \* Monitor community service ordered by Youth Court
- \* Monitor restitution payments ordered by Youth Court
- \* Youth volunteer and receive training on the legal, court and juvenile justice system
- \* Services for victims such as mediation, community work service, restitution are offered
- \* Youth receive immediate consequences for offenses they have committed
- \* Offending youth make timely restoration to the victim and/or community
- \* Referrals for drug and alcohol education classes
- \* Adult community volunteers are actively involved in mentoring youth (lawyers, judges, educators, parents and other community members)
- \* School referrals for alternatives to suspension

#### Referrals:

The number of youth referred to Youth Court during FY 2003 was 927 or approximately 14% of the total number, 7,415, of State of Alaska Released December 15th

Public Safety, Juvenile Accountability, and Victim Services:

The mission of the Division of Juvenile Justice (DJJ) is to address juvenile crime by promoting accountability, public safety and skill development.

Juvenile Probation Officers (JPOs) are responsible for:

- Receiving and reviewing police reports involving an offense by a juvenile;
- Determining an appropriate course of action for a youth, which could include counseling with parents, referral to a youth court or other diversion program, or pursuing formal court proceedings. Probation officers base such decisions on a variety of factors, such as the seriousness of the offense, age at time of offense, the youth's offense history, and the ability to manage the issue without formal court processing.
- · Assisting the youth and family in how to work with the State's public safety, court, and legal systems;
- Contacting victims, involving them in the justice process and determining restitution;
- Monitoring juvenile offenders to ensure they are held accountable and that the public is safe;
- · Partnering with families, local agencies, and organizations to involve juvenile offenders in developing skills and reducing the likelihood of re-offense.

Alaska's Juvenile Probation Officers have important responsibilities and are required to be available 24 hours a day, seven days a week, to make public safety decisions about youth who have committed crimes. They are expected to respond in a timely manner to juvenile crime, and to provide appropriate levels of supervision and support to offenders, their families, and those who have been impacted by their crimes.

DJJ is continuing its efforts to enhance supervision, safety and accountability capabilities in the community to ensure a comprehensive and more cost-effective approach to juvenile crime. The Division is in the process of implementing a research-based approach to managing juvenile cases through the adoption of the Youth Level Services-Case Management Inventory (YLS-CMI) risk-need assessment process. This significant system change supports DJJ's performance targets of reduction of juvenile crime and improvement in reoffense rates through the use of risk-focused intervention to assist in the juvenile justice decision-making process. The use of the YLS-CMI will enable the agency to move toward public safety decision-making based on the use of a well-researched and validated approach to determining which youth are likely to pose a higher risk to the community. Such information will also enable DJJ to more effectively intervene with juveniles and to more appropriately determine the use of resources based on data.

Required resources include seven additional juvenile probation officers to ensure that evidence of risk is assessed at the front end of juvenile law violations. This component also includes four FTE's for victim services throughout the state, on a regional basis. The need for a community-based service continuum is well-documented and the package also includes

funds for a range of community-based interventions for youth.

A critical element of probation work is the requirement to transport hostile, dangerous juvenile offenders. DJJ vehicles must be modified to cage off the back area to make it secure for the juvenile and probation officer during the transport. Transportation is needed primarily when a juvenile is arrested or needs to appear in court. Other examples include when the juvenile requires a medical transport or is traveling in from a remote community. The Valdez probation office does not have a vehicle. Though they share an office with the Office of Children's Services (OCS) and theoretically have access to a vehicle, this does not work in practice as OCS has the vehicle in use most of the time due to the nature of child protection work. In addition, the JPO has to travel to Glenallen regularly, which requires use of her personal vehicle since she cannot leave the OCS office without a vehicle for the entire day. This severely hampers the JPO's ability to arrest or transport youth. Althought the Alaska State Troopers provide assistance for juvenile transports, competing public safety demands often result in arrests and transports being delayed.

Increase by \$225.0 resources for Youth Courts and other services provided to the client population served by the division. These other services may include (but are not limited to) non-secure shelters, other alternate living arrangements, counseling, support or skill development services for both youth and parents, etc.

Transfer in \$12.0 to offset the amount transferred to MSYF for SDPR Receipts.

The Division of Juvenile Justice (DJJ) and Communities in Schools, Mat-Su (CIS Mat-Su), and the Mat-Su Borough School District (MSBSD) have cooperatively progressed toward their shared vision and mutual goal of providing at-risk youth with a continuum of services from institutional placement to full community-school reintegration.

During the 2001-02 school year MSBSD, DJJ and Communities in Schools-Alaska jointly developed a program called the Alternative Special Education network. This program has served to fill a necessary component in the continuum by providing IEP services and general curriculum access to suspended or expelled special education students.

Collaboratively, the aforementioned agencies have enhanced programmatic continuity by extending the Alternative Special Education Network staff into connecting program along the service continuum. They formed, together with their sources of support, the Alaskan Supported Proactive Educational Network (ASPEN).

ASPEN has been fortified for the 2004-2005 school year by the MSBSD providing a part-time school psychologist, DJJ providing a Transition Probation Officer, CIS Mat-Su providing a Program Coordinator.

DJJ is reimbursed by the school district for approximately two days per week of the Transition Probation Officer's expenses. To post these receipts SDPR authority is required in the Mat-Su Component.

ADN 06-5-0018 Interim Ass Secondary Screening	sistance L	IT	0.0	0.0	0.0	114.0	0.0	0.0 -114.0	0.0	0	0	0

This change record transfers \$114.0 from grants to contractual within the Adult Public Assistance Program (APA) component to continue approved cost savings measures implemented in FY2004. The APA formula caseload and budget was reduced for the projected savings in the Interim Assistance (IA) program by establishing a more comprehensive medical review of IA applicants. The contractual allocation continues the RSA with the Division of Pioneer Homes for a Nurse Consultant that provides a secondary review of medical justifications for disability of IA applicants.

In Alaska, SSI applicants waiting for a disability determination may be eligible for Interim Assistance (IA), a state funded cash benefit of \$280 per month. To be eligible for IA, an SSI applicant's physician must confirm that the applicant appears to meet the SSI definition of disability. The FY2004 APA budget added a medical review to the IA application process. This resulted in the opening of fewer IA cases with only those applicants likely to be found eligible for SSI receiving IA. This increased the accuracy of the initial disability screening process and reduced IA program expenditures by decreasing the number of persons on IA who subsequently do not qualify for SSI.

The Adult Public Assistance Program was established with the mandate to provide income support for needy elderly, blind and disabled persons. APA benefits serve as a supplement to federal Supplementary Security Income (SSI) and allow the individual to meet basic needs and to remain independent in the community. APA also provides Interim Assistance (IA), a state funded cash benefit of \$280 per month for SSI applicants waiting for a disability determination. People who receive APA financial assistance are over 64 years of age or experience severe and long-term disabilities that impose mental or physical limitations on their day-to-day functioning. Certain income and asset eligibility standards apply.

The FY2006 APA formula projection is 16,735 APA cases receiving cash assistance each month at an average supplemental payment of \$288 per case. The projected APA annual rate of caseload increase is 2.1% in FY2005 and 3.4% in FY2006.

FY2004 and FY2005 actions that helped reduce the rate of APA expenditure growth include the following:

- 1. Secondary medical review to the Interim Assistance (IA) application process. Implemented in FY04, this policy change resulted in the opening of fewer IA cases with only those applicants likely to be found disabled and eligible for SSI receiving IA. It reduced IA program expenditures by decreasing the number of persons on IA who subsequently do not qualify for SSI.
- 2. New benefit start for APA cash benefits. This change aligned the APA benefit start date with the date an APA applicant is notified by the Social Security Administration that Social Security benefits have been approved, or the date the Division is notified by the DDS of a state-only disability determination. While applicants may still qualify for retroactive Medicaid back to the date of the initial APA application, they no longer qualify for a retroactive APA cash benefit.
- 3. New APA payment level for APA recipients residing in assisted living homes. Individuals living in assisted living homes are paid up to \$100/month for their personal needs. Prior to FY05, APA recipients living in assisted living homes received the same APA payment as an individual living independently in their own home. This policy change resulted in general fund savings by reducing the maximum APA payment to a resident of an assisted living home to \$100, and billing the difference between their monthly income and their cost-of-care (less \$100 for personal needs) to Medicaid. Approximately 550 APA recipients were affected by this change and had their APA benefits adjusted.
- 4. Eliminate the replacement of federal SSI benefits that are lost due to in-kind income. Prior to FY05, APA recipients who have their SSI benefits reduced because of in-kind income, received a higher APA payment to make-up for the reduction in SSI. This policy change eliminated the extra APA payment for the replacement of the lost SSI benefits. Approximately 450 APA recipients were affected by this change and had their APA benefits adjusted.

1189 Sr Care -6.958.7

The Senior Care Program is scheduled to sunset in December 2005 or whenever the federal Medicare Part D prescription drug benefits are implemented. This decrement is based on the fiscal note for Chapter 3, SLA 2004 which assumed implementation of the federal Medicare Part D effective January 2006. If there is a delay in the new federal prescription drug benefits program, then the Senior Care program will need to be extended or changed with some funding restored.

It is anticipated that there will be a fiscal note associated with proposed legislation affecting the Senior Care Program.

The Division of Finance implemented new account code structure effective July 1, 2004. This action significantly revised the accounts to be used for capital (equipment) outlays. Expenditures for IT equipment and office furniture/equipment items with unit cost of less than \$5,000 use new account codes reporting to 74000 Supplies.

This unit cost threshold typically covers all equipment purchases supporting PA field offices. This change record transfers the component's "Equipment" allocation to the "Supplies" line item to comply with the new account coding instructions and for ease in administering federal allowable cost principles for capital outlay items.

In October 2004, the Dept. of Health & Social Services, Division of Public Assistance (DPA) was awarded a federal TANF High Performance Bonus of \$3.18 million. DPA received this bonus payment for its exceptional performance in federal fiscal year 2003 in moving welfare recipients from public assistance to the workforce. Alaska received the maximum bonus allowed for ranking highly in the nation in 2003 for the "job entry" category - the percent of people placed in jobs. Alaska also received bonus funds for offering services to families so they can have affordable, guality child care.

The following represents the Department's proposed spending plan for investing the federal TANF performance bonus funds:

Public Health RDU

Women Children and Family Health component

Statutory Rape Reduction Project

The Division of Public Health undertook a statewide campaign to reduce the incidence of sexual assault of young girls through a campaign funded in part by Division of Public Assistance, Temporary Assistance to Needy Families (TANF) in FY02 and FY03. These requested funds will continue upon that campaign. TANF share of project financing is \$480.0.

Behavioral Health RDU

Behavioral Health Grants component

Substance Abuse Prevention/Intervention - Statewide Multi-media Education Campaign

This project is to develop broad, diverse and comprehensive multi-media campaign aimed at children, youth and parents and the public to involve all Alaskans in recognizing the damage alcohol causes. TANF share of project financing is \$500.0

Substance Abuse Prevention/Intervention - Reach Out Now

Utilizing materials developed for this national model, will provide community grants to agencies working with their community's school programs. Program will focus on a school-based educational approach, with trained agency staff providing information, and then developing an ongoing dialogue with 11-12 year olds about alcohol and drugs. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free Training and leadership for young people who might be experiencing peer pressure to drink. Community grants to youth organizations who would like to partner with the state to increase public awareness of this issue and mobilize action to decrease early on-set drinking and utilize youth as leaders/mentors among their peers. TANF share of project financing is \$500.0.

Behavioral Health RDU AK Fetal Alcohol Syndrome Program component
Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free
The TANF funded part of this project will fund Community Based Prevention and Service Improvement. This project will fund
State of Alaska

community-based FASD improved services programs focusing on interventions and services such as respite care, case management, mental health services, substance abuse services, job training/vocational rehabilitation and services to work with women at risk for giving birth to a child with an FASD. TANF share of project financing is \$500.0.

Boards and Commissions RDU Gov's Advisory Council on Faith-Based and Community Initiatives component Creation of Faith Based and Community Initiative Council

Establishing the Governor's Advisory Council on Faith-Based and Community Initiatives and the Office of Faith Based and Community Initiatives in the Department of Health and Social Services will jointly serve to facilitate communication and collaboration between faith-based and community-based organizations and government agencies in order to address gaps in Alaska's work force and health and social services systems. TANF share of project financing is \$105.0.

Public Assistance RDU PA Administration component

Other Federal TANF funded services and initiatives promoting self-sufficiency and client services within the parameters eligible for TANF funding. While Alaska's TANF caseload has been decreasing the number of extremely low-income working families needing Child Care Assistance, PASS II/III has increased. The TANF share of project financing for additional Child Care Assistance is \$595.0.

Quality Workforce and Inte	grated Service											
Enhancements												

1003 G/F Match 143.6

Quality Workforce: On-going formula Medicaid casework requires adjusting allocations of GF Match to leverage available federal funding (\$118.6 GFM). FY05 funding transfers to directly finance Medicaid eligibility casework in the division did not include sufficient GF match to fund maintenance level work.

Intregrated Services Enhancements: The Tanana Chiefs Conference (TCC) operates the "Athabascan Self-Sufficiency Assistance Partnership" (ASAP), a Tribal Temporary Assistance for Needy Families (TANF) program. ASAP serves approximately 450 TANF-eligible families with cash benefits and employment assistance. Food Stamp participation by ASAP clients fluctuates between 51% and 64%, well below the average of 80% participation by recipients of the Alaska Temporary Assistance Program (ATAP). A significant factor in this disparity is the absence of a single-point of access to both Tribal TANF and Food Stamp services. While TCC serves TANF-eligible families with cash assistance and work services, the state of Alaska Division of Public Assistance (DPA) must provide eligibility determination and certification for food stamp benefits. Families are required to interface with two offices and eligibility systems, two caseworkers and must marshal double the effort to receive the nutrition supports for which they are eligible. DPA staff in turn carry large caseloads that include families served by the ASAP program. As such, these dual systems provide duplicative services at significant cost to the state and to needy families.

To address these barriers to food stamp participation experienced by ASAP families, DPA and TCC have proposed a four-year Food Stamp Demonstration Project in which TCC will administer a Tribal Food Stamp program for those families served by the ASAP program. While plans for the project have not been finalized, the federal Food and Nutrition Service (FNS), which administers the Food Stamp program, has expressed a strong interest in our project proposal. As a condition of authorizing the Food Stamp Demonstration Project, FNS is requiring that the project include an evaluation component. At a minimum, the evaluation must measure timeliness and accuracy of eligibility determinations, as well as administrative costs and program services compared to the existing system.

FNS has stipulated that the evaluation must be performed by an entity independent from DPA and must be approved by FNS. This will require that DPA pursue contracted evaluation services at a cost of \$25.0.

The Division of Finance implemented new account code structure effective July 1, 2004. This action significantly revised the accounts to be used for capital (equipment) outlays. Expenditures for IT equipment and office furniture/equipment items with unit cost of less than \$5,000 use new account codes reporting to 74000 Supplies.

0.0

5.0

-5.0

0.0

0.0

This unit cost threshold typically covers all equipment purchases supporting PA field offices. This change record transfers the component's "Equipment" allocation to the "Supplies" line item to comply with the new account coding instructions and for ease in administering federal allowable cost principles for capital outlay items.

Instate travel is necessary for QC staff to conduct case review on Public Assistance recipients to determine correctness of eligibility and benefits. Quality Control case review is a federally required function where cases are selected on a federally approved random sample. This activity requires a maintenance level adjustment to QC travel of \$20.0.

1002 Fed Rcpts 1003 G/F Match	281.9 281.9	This increment is by federal "Paym		•		• •	d medical se	rvice review	requirements	mandated			

Centers for Medicare and Medicaid Services (CMS) issued proposed regulations that require states to sample payments on Medicaid claims. CMS issued these regulations to meet requirements in the Improper Payments Act (IMPA) passed by Congress. CMS makes these regulations effective October 1, 2005. The regulations mandate a quality control review of payments to medical providers, including a review of the eligibility criteria, medical necessity, and correctness of the payment. The proposed requirements assume a 50% error rate for all states, and CMS wrote the sampling requirements to ensure each state would draw approximately the same number of claims in an annual sample. This creates a statistically valid National Sample, and an inordinately large sample size for Alaska.

To meet the requirements described in the regulation, Alaska's Division of Public Assistance will need to increase Quality Control staff to complete the case reviews by 7 PFT at an estimated cost of \$563.8 in FY06.

Breast & Cervical Health Check (BCHC) is part of a national program with the goal to reduce breast and cervical cancer morbidity and mortality in medically underserved women. Additional funding for this program will assist in expanding the number of clinical providers and services for women who meet the eligibility requirements. Medical providers will be recruited in communities that are under served or not served at present. With an increase in breast and cervical cancer screening, diagnosed cancers will be identified earlier and thus treated earlier leading to a decrease in overall costs of cancer treatment, morbidity, and mortality with an associated increase in cancer survival rates.

**Positions** 

Based on census data, there are currently 55,000 women in Alaska between the ages of 18 to 64 who are at or below 250% of poverty, the target population for this program. Of this group, The Center for Disease Control estimates that nearly 15,000 of these women are without any type of health insurance.

BCHC served a total of 6,200 women in FY 04 which was an increase of 1,400 from the previous fiscal year. The Division of Public Health proposes to increase the number of women served by 2,750 in FY06, bringing the total number of women served per year to approximately 8,950.

Funding increments for services include:

Screening and Diagnostic services - \$962.5

10 additional medical providers would need to be recruited to meet the goal of serving an additional 2750 women. Expansion of provider contracts into areas of unmet need would be undertaken with a focus on the following communities where there are currently no BCHC screening/diagnostic providers: Nome, Kotzebue, Bethel, Dillingham, Glennallen/Tok, Valdez, Skagway/Haines, Unalaska/Dutch Harbor. Contractual funds would also provide for recruitment of additional screening providers to handle the increased number of women needing BCHC screening services in locations such as: Fairbanks, Anchorage, Palmer/Wasilla, Juneau and Ketchikan.

Outreach - \$25.5 - Outreach is needed to inform women about the importance of breast and cervical cancer screening services and assist them in the referral to BCHC providers in their community. This would also allow for printing of outreach materials.

Staffing - \$304.0 - Based on CDC requirements, BCHC is a very complex, data driven program that includes the mandated program components of clinical quality assurance, professional and patient education, case management and outreach. Four PFT and one PPT positions would be added.

Nurse Consultant II (06-#059)- provide clinical consultation to medical providers, clinical quality assurance and

The Division of Public Health undertook a statewide campaign to reduce the incidence of sexual assault of young girls through a campaign funded in part by Division of Public Assistance, Temporary Assistance to Needy Families (TANF) in FY02 and FY03. These requested funds will revive and enlarge upon that campaign.

The project will consist of public information; provider education (for health care providers who serve teens and young adults); TV ads; news print media; engagement of schools, parents, and troopers; etc. It will assess the best information available and efforts made in other states to update and improve our media messages and will include an evaluation as to the effectiveness of the campaign. To manage this project, two positions are requested: a PFT Health Program Manager II (06-#064) and a PPT Public Health Specialist II (06-#065). In SFY05 an assessment of all DHSS policies and procedures in places where the department interacts with teens will also be conducted to ensure that policies and practices are consistent with state law and any necessary staff education and accountabilities are in place.

Research on adolescent pregnancy cited in a report from the California State Department of Health indicates that the majority of fathers of children born to teenaged mothers were ages 20 and older in 1995. The younger a teen is at the time of her pregnancy, the more likely it is she will drop out of school and ultimately require public assistance. Babies born to younger teens are also more likely to have health and developmental problems than those born to adult women. Currently only minimal Alaska data is available to assist with determining the extent of the problem in our state.

Federal agencies funding state-managed programs such as Title X family planning, TANF, Abstinence and Adolescent Pregnancy Prevention, have made awareness and reduction of sexual assault ("statutory rape" reduction) a priority for their grantees.

A DHSS Statutory Rape Reduction Planning Committee has identified several goals of the statutory rape program if funded. They include:

- 1. Identify a target audience(s) for the public media campaign. Such target groups identified to date include members of the military and males.
- 2. Assure consistency of policy application and reporting requirements as part of the education for health care providers, teachers, social workers and others who are mandated reporters.
- 3. Provide community-based opportunities to develop acceptable programs aimed at reducing the incidence of sexual assault among minors and helping youth assertively resist attempts at sexual coercion or assault.
- 4. Develop a methodology for data collection and analysis.
- 5. Develop an evaluation process to assess effectiveness of the public awareness campaign as well as provider education.
- 6. Educate DHSS department personnel and other state agencies that work with teens about the statutory rape law and assure consistent policy application.

Finally, consideration should be given for continuing this campaign on a periodic basis (every 2-3 years), if not performed annually.

The interagency receipts will be received from the Division of Public Assistance from Temporary Assistance to Needy Families (TANF) high performance bonus funding awarded by the federal government to DPA for performance in FFY03. The GF portion will support the development of data collection and analyses methodologies, which are not eligible for TANF funding.

PCN 06-1734 has been changed from a FT to a PT.

PCN 06-#167 is a non-perm Administrative Manager II position. It was necessary to create this long term project position (PCN 06-N1379) to assist in the transitional moves and reorganizations of many DPH employees both in Juneau and in Anchorage. This position is also needed to assist with BioTerrorism administrative duties and Medicaid administrative duties within the Director's Office during this transitional time.

Centers for Medicare and Medicaid Services (CMS) Background Checks Pilot Project:

A provision in the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (PL 108-173) permits the Federal government to enter into a three-year agreement with up to 10 states to design, develop and implement a demonstration project to evaluate the effectiveness of conducting background checks on prospective employees of long-term care facilities and providers who have direct access to patients. The pilot project is funded for FFY2004 through FFY 2007. This project is designed to improve the safety and quality of care for patients and residents who receive services from the long-term care facilities or providers, and will have statewide program and service provider implications.

Frontier Extended Stay Care Clinics (FESCC) Pilot Project - Department of Health and Human Services. The department is working on culminating five years' multidisciplinary work with CMS to establish a new health services provider type. The department's challenge at this time is to develop recommendations for CMS review relating to FESCC certification, review standards, model statutory/regulatory language, and estimating administrative/program costs for Alaska and for all frontier states combined.

The Certification and Licensing program was consolidated from three divisions into a single component in the FY05 budget in order to ensure statutory and regulatory standards are met by licensed homes. New positions are being established to create a Section Manager and three Community Care Licensing Specialists II's, which will function as lead investigators where allegations and potential results are severe, complex, lengthy, and often involve multiple charges and to ensure inspections of facilities.

A non-perm Project Coordinator is added to to establish a framework for a program to evaluate national and state background checks on direct access employees working with DHSS clients. The incumbent will design the IT/management support blueprint for the Centers for Medicare and Medicaid Services (CMS) funded three-year pilot project to create a background investigations unit. A non-perm Administrative Clerk is added to handle increased case loads of additional positions.

These positions will be funded by federal authority transferred in for new federal grants and existing general funds freed up by obtaining new federal grants.

PCN 02-7441 reclassed from PT Social Worker to FT Community Care Licensing Specialist I.

The primary role of the Certification and Licensing Section (C&L) is to license and inspect a broad range of health care facilities and providers, including hospitals, nursing homes, home health agencies, assisted living providers, and other health care facilities. Centralization of the certification and licensing functions previously performed by several divisions within the department, as well as work performed by other state agencies, began with the official transfer of licensing functions specifically related to health/medical services and assisted living to the Division of Public Health in July 2004.

The current allocation of staff resources for the Assisted Living Home program is not adequate to maintain the current Assisted Living Homes Program requirements or anticipated needs. As of October 2004 there are 402 homes currently licensed in Alaska, with an average increase approximating 15% annually. This equates to a current caseload in excess of 90 homes per licensing specialist. While there is no "industry standard" for a manageable assisted living home caseload due to differences in programs from state to state, the accepted limit is 65-70 depending on the mix and complexity of the home clientele.

Continued operation at existing staff resource levels translates into the Assisted Living Home program's inability to sustain minimal standards of service, jeopardizing the health, safety and well-being of the Department's assisted living clientele. It also has an adverse effect on the program's ability to effectively monitor and continue risk reduction efforts.

Support for this increment will allow the division to accomplish the following:

- a. annualize the cost of three new Community Care Licensing Specialists established in the FY05 Management Plan and budgeted for 9 months. These positions were established to promote, license and monitor community assisted living homes for the severely mentally ill and/or developmentally disabled adults, and for assisted living homes providing care primarily to persons who have a physical disability, who are elderly, or who suffer from dementia. The new positions will also function as lead investigators on complaints of neglect and/or abuse reported to the assisted living program office;
- b. appropriately reclassify existing assisted living staff who have now assumed new and additional duties/responsibilities;
- c. contract with a regulations specialist to work with Certification and Licensing staff and the Department of Law on changes to existing regulations including the proposed fee structure;
- d. provide travel funding for complaint investigations, annual inspections, required out-of-state professional training for new licensing staff and cross training for existing staff;
- e. associated contractual and commodities costs for expanded office.

Statutory and regulatory authority to establish and collect fees generated by these programs is currently in place. The Department is in the process of studying and developing a comprehensive plan for implementation of a new fee schedule for these certification and licensing activities. Revenues collected will be reinvested in the certification and licensing program to assist the department in meeting its commitment to quality life, health and safety for clients served by the programs the department is responsible for licensing.

Sustain Poison Control Services	for Alaska Inc	70.0	0.0	0.0	70.0	0.0	0.0	0.0	0.0	0	0	0

1004 Gen Fund 70.0

On September 1, 2001, Alaska gained access to the nationwide toll-free number for poison control center services. Callers in Alaska are connected with the Oregon Poison Center (OPC), answering phone calls from both the public and healthcare providers and providing medical assistance and training to healthcare providers. OPC is a certified poison center with medical toxicologists available 24/7. Alaska has neither a certified poison center nor medical toxicologists. Without this service Alaska would be the only state in the nation without access to a certified poison center.

At this point the incremental costs for the Alaska cases is \$140,000. OPC is currently being reimbursed \$60,000 from federal funds for this service. Beginning October 1, 2004, it will be necessary for Oregon to charge Alaska \$70,000 to make up this difference (they have indicated they will absorb the \$10,000 difference), or discontinue services.

The collaborative efforts of the Oregon Poison Center (OPC) and the Section of Community Health and Emergency Medical Services (CHEMS) for the State of Alaska, have resulted in comprehensive service to Alaska. The implementation of this service is widely recognized as a model for successful program development of a public health service. Since the initiation of the toll-free poison center number in Alaska in September 2001, the utilization of this resource has been phenomenal. During 2003, the OPC received 9,590 Alaska calls with 6,933 human exposures.

The high call volume has provided significant workload for the OPC staff. OPC is only compensated at a cost of \$8.65 per call, which is significantly lower than the national average of \$45 per exposure call. The average cost per human exposure call for the Oregon Poison Center is \$30. Using economies of scale, the OPC has attempted to keep expenses low; however, they cannot subsidize the cost of Alaska calls to the extent of the funding shortfall.

The savings attributed to the use of poison centers is well documented. For every \$1 spent on poison centers, an estimated \$7 is saved in medical care costs. Each call to a poison center prevents \$175.00 in other medical spending. The average cost per poison exposure managed by a poison center is \$28.00; the average hospital cost for a poison exposure is \$245.00.

ADN 06-5-0019 Add Five PFT Positions and Two Non-Perm Positions for Lab Testing & Bioterorism Preparedness

Four full-time positions were added in FY04: PCN's 06-#166 (06-1966) a Chemist IV, 06-#164 (06-1965) a Chemist III, 06-#165 (06-1964) a Laboratory Technician, and 06-#030 (06-1942) a Chemist V. These four positions are funded by the Bioterrorism Focus Area D which is Laboratory Preparedness for Chemical agents.

Add one full-time position 06#213 PH Microbiologist I to work on the contract the Alaska Native Hospital is going to have with Public Health for provision of sexually transmitted disease testing. This position will be funded by statutory designated program receipts.

Two non-perm College Intern positions PCN's 06-#023 (06-N048) and 06-#125 (06-N023) were added. A College Intern IV assigned to the Fairbanks virology lab to perform tests for Hepatitis A, B, & C, pre-analytical preparation of viral isolates for antibody typing, and operation of an automated analyzer. The position will allow the Public Health Microbiologist I to cross-train in molecular procedures for detection of Norovirus, SARS, Rabies and West Nile Virus. The College Intern II position has been created to assist the Chemist V position in laboratory.

Utilize increased tobacco tax revenue for tobacco prevention and cessation activities	Inc	1,230.0	0.0	0.0	630.0	0.0	0.0	600.0	0.0	0	0	0

1168 Tob Ed/Ces 1.230.0

This increment will allow the Division of Public Health to utilize additional revenues generated from the increased tobacco tax to support expanded tobacco prevention and control activities.

The Tobacco Prevention and Control Program in the Division of Public Health has four major public health goals: (1) to prevent initiation of tobacco use among young people; (2) to promote quitting among adults and young people; (3) to identify and eliminate tobacco-related disparities in specific populations identified as of special vulnerability or with above-norm tobacco use patterns; and, (4) to eliminate exposure to secondhand smoke. The Centers for Disease Control and Prevention's (CDC) Best Practices for Comprehensive Tobacco Control Programs recommends both minimum and maximum funding levels as well as program composition for comprehensive tobacco programs in each state. Alaska's tobacco program is organized and funded in order to follow CDC's Best Practices and to achieve the program goals noted above. Alaska's FY 05 funding level for tobacco activities of \$5,251.8 (Federal and Tobacco Fund) currently falls short of CDC's recommended minimum level of \$8,100.0 by \$2,848.2. This increment will bring Alaska to within one and a half million dollars of CDC's recommended minimum.

Based on the Centers for Disease Control and Prevention's Best Practices for Comprehensive Tobacco Control Programs and specific recommendations from the Alaska Tobacco Control Alliance, the Division will utilize these funds in the following program areas:

- · Community-based programs to reduce tobacco use (\$400,000)
- Cessation programs (\$500,000)
- Media/countermarketing (\$100,000)
- Surveillance and Evaluation (\$230,000)

It will support the expansion of grants and contracts to community-based organizations and statewide associations involved in supporting the goals of tobacco prevention and cessation in Alaska.

"It is the intent of the legislature that the Department of Health and Social Services continue cost containment by encouraging lower cost residential based care for the elderly and severely disabled. Further, it is the intent of the legislature that the Department address escalating growth in the Personal Care Attendant program through regulation to avoid the loss of home care provider services and the consequential growth in institutional facilities in this state."

1.000.0

To this end, the Division of Senior and Disabilities Services will be contracting with an outside agency to perform Medicaid audits of service providers in both the Personal Care Attendant (PCA) Program and the Assisted Living Home (ALH) Program. The contract will be for \$1,000.0, and will be 75% federally reimbursable with a 25% state GF match requirement. We expect this contract to save money both in unexpended funds and in Medicaid cost recovery from the PCA and ALH programs.

In the FY2005 budget the Department proposed an aggressive package of cost containment proposals to reduce Medicaid costs. For the Senior and Disability Services Medicaid Program the total reduction was estimated at \$48.5 million, including \$20.3 million in general funds.

Docitions

The Department is requesting an increment of \$16.7 million, including \$7.1 million in general funds, to restore funding to the base budget for those areas of cost containment that are not anticipated to be attainable at this time. However, it should be noted that the department continues to consistently work towards containing costs of Medicaid wherever possible.

Progress has been made towards implementation of many of these proposals despite delays, political and industry push-back, administrative difficulties, provider complaints, etc. that have hindered implementation and subsequently reduced the original estimate of cost savings. Additionally, the current Medicaid Management Information System (MMIS) has limitations that have delayed system changes until approximately the spring of 2006 when the new information system currently under development can be implemented.

Although, it is difficult to identify the results of cost containment over a short interval of time, the department will continuously track the progress of cost containment implementation and reassess any additional savings or potential shortfalls that may result from these proposals.

#### Increment Breakdown

OA/AD Contract: \$681.8 GF: \$1.022.7 Federal.

In March 2004, the assessment function for Level of Care Assessments was removed from the Care Coordinator to an independent contractor working for DSDS. However, each year, Waiver clients must be reassessed for medical eligibility. There have been several cases in which clients were denied Level of Care at annual renewal, yet because they can appeal such decisions while continuing to receive services, and since this process can take several months to complete, savings do not occur until the appeal process is complete.

Medicaid Waiver Savings: \$2,174.5 GF; \$3,255.8 Federal

The DSDS issued a Request for Proposals to conduct a cost study for the Medicaid Waivers with the intent of standardizing the methodology for calculation of reimbursement rates and establishing a fair and reasonable reimbursement rate for each of the Waiver services. The Department received no responses to this RFP. DSDS staff then organized a Cost-Study Task Force to review all Waiver payment structures for the various service categories. Task Force members included DSDS staff, provider representatives from each of the four Medicaid Waiver services, and Older American Act grantees. The task force reviewed reimbursement information by region and type of service for each provider. Given the magnitude of the cost differential from one agency to another and absent appropriate regulatory authority to make changes to "annual"

reimbursement rates," the cost study was placed on hold. (This occurred at the same time the industry was extremely upset and vocal over other regulatory changes.) DSDS is now working with the GCDSE, the ACoA and the AMHTA in preparing another RFP to conduct a long-term study for the state of Alaska regarding all LTC expenditures including Nursing Homes, the four Medicaid Waivers and the PCA program. This study will investigate appropriate reimbursement rates, a comparison of Alaska's long-term care system with those in other states (including served and under served populations), and make recommendations for responsible change. The new Home and Community Based Regulations that took effect on June 28, 2004 have placed a moratorium on any increases in cost-based reimbursement rates. DSDS staff is currently working with DD provider agencies to establish a uniform cost based rate for each service category within the provisions of the moratorium. Once this project is complete any new client placed in service will have a specific rate for each type service and will not be allowed to receive "bundled" services. (Under the DD program, the cost of service is based upon the client and not the individual services.)

**Positions** 

Eliminate Exceptional Relief: \$1,000 GF; \$1,355.0 Federal

Final regulations did not eliminate exceptional relief but did add two cost containment provisions. Both of these provisions help to clarify that the department intends to offer exceptional relief only when Medicaid patients will lose access to services to a greater degree than the general public. At this time it is not possible to determine how much of this reduction is achievable through these regulatory cost containment efforts.

Limit Administrative and General Costs: \$580.0 GF: \$870.0 Federal

Reduce Respite Utilization: \$1,590.0 GF; \$2,392.0 Federal

The regulations for these services became effective on June 28, 2004, and it is anticipated that part of the originally proposed cost savings should be achieved. However, under the four Medicaid Waiver programs, clients receive approval for a one year Plan of Care.. On the advice of legal counsel, the Plan of Care is considered a contract between the state and the client and could not be changed by regulation. As each Plan of Care comes up for renewal, the new regulatory provisions will take effect. However, the MRDD Waiver program currently requires manual input of data since the conversion has had significant problems and rejected about 20% of client billings.

Nursing Homes - Preadmission Care Plans: \$1,540.9 GF; \$2,459.1 Federal

This reduction proposal did not take into consideration the level of need for Nursing Home care. Although this cost containment measure has been implemented and DSDS staff has been very successful in reducing admission to Nursing Homes or transferring existing clients out of nursing homes, savings have not been realized since each time an individual has been transferred out, another individual in need of Nursing Home care has been admitted.

Other savings through implemented cost containment measures not budgeted:

Implementation of the following items results in additional savings in FY05 not originally anticipated in the FY05 budget and

The division currently has a contract with a private business to perform assessments for the Older Alaskan and Adults with Physical Disabilities Waivers. In order to ensure that individuals entitled to services receive the level of services appropriate for them to live a quality life, the division has decided that these assessments need to be done in-house rather than contracted out. Two permanent full-time positions are added. By doing this in-house we can perform the same assessments cheaper and faster than the contractor. The contract will terminate at the end of FY2005.

06-#031 and #032 Health Program Manager I.

from occurring to those vulnerable Alaskans who are 18 years old or older. Vulnerable adults are those individuals who have a physical or mental impairment or condition that prevents them from protecting themselves or from seeking help from someone else.

The services that are provided include: 1) information and referral; 2) investigation of reports; 3) protective placement; and 4) guardianship or conservatorship counseling.

The population of the state has been aging. As a result of this increase in the age of Alaska residents and the increase in age related disorders such as Alzheimers and Dementia, the division is requesting one additional staff member to handle the increased caseload. Currently, the average monthly caseload for each Social Worker in the program is 45. This additional staff person will reduce the caseload to 39.

06-#034 Social Worker II

Failure to fund this increment will impact the responsiveness of the division to reports of harm to this vulnerable population.

In FY2003 new Consumer Directed PCA regulations were promulgated. With these regulations the consumers were allowed to select the level of services that they would receive without controls being in place. There was 779% growth of this progam in four years. There are approximately 3,100 individuals currently receiving PCA services.

Two staff have oversight of this entire program. With the growth, the workload has become unmanageable. As a result in FY2005 the division established eight long-term non-permanent positions to perform assessments and oversee the payment for services provided. This transfer will provide the funding for the establishment of permanent full time PCA program staff in an associated position adjustment. The funding will be available as the result of the savings generated from the tighter controls on the program.

In addition the division is requesting an additional position and transferring the funding for the Quality Assurance (QA) program for review of these services.

The funding for the PCA program is \$704.8 and for QA is \$94.2.

This federal grant was awarded to the state September 30, 2001. The program has transitioned 53 people from nursing home facilities into the community at an average cost of \$1,900 per transition. Ten people were transitioned in FY2003, 34 in FY2004 and as of September 15 - 13 in FY2005. The program staff estimates that we will transition 35 to 50 per year at a cost of approximately \$2,000 per person for transition costs for a total annual grant cost of \$70,000 to \$100,000. Currently, we are averaging about 5 per month.

The budget under the federal grant is:

Personal Services	\$ 70.0
Travel	15.0
Commodities	39.0
Supplies	1.0
Grants	100.0

The services provided from this grant have been extremely varied and may include chore services, PCA services, cleaning, lifeline, ramp, transportation, moving costs, wheelchair repair, handrail, and some Environmental Modifications. The services are enough to physically get the person into the community so that they qualify for waiver services.

The main function of the program staff has been to expedite waiver approval so we can be sure that the person will have services and supports after they are transitioned. This program has been staffed by a long-term, non-permanent position with a permanent position being established in the FY2005 Management Plan.

The annual savings is approximately \$85,000 per person. Based on the annual costs for FY2003, nursing facility costs for this group of individuals would have been \$6,132,365; whereas the waiver costs for the same group was \$2,843,921 for a savings of \$3,288,444 per year. The savings is reapplied to the SDS Medicaid Component, and reduces the need for the building of additional Nursing Facilities throughout the state.

In order to continue moving clients from Nursing Facilities to Community Services, this GF increment is needed, as many of the initial services which this program pays for are not covered by Medicaid. The federal grant was awarded for three years; and we have had a no cost extension due to the slow start up. The grant is slated to end in September, 2005.

Success stories abound, including some with unique Alaska situations. One of those stories involves a gentleman from Kenny Lake, who was in a facility in Anchorage. He no longer needed to be in the nursing facility and could be supported in the community. The fact that this gentleman lived on a homestead without running water didn't deter him from going home. The grant funds were used to pay for transportation, PCA services and care coordination services for a trial visit to the

homestead. Determination was made that it was possible for him to reside at home with community supports and services. He has been home several months.

Another success story is a man from Kipnuk who had been in Anchorage either in the hospital or the nursing facility for a year. He had a motherless sixteen-year-old son at home. The grant funds paid for transportation, room and board for a caregiver from the village to receive training in Anchorage in his care and to escort him home. The caregiver reported that the man was met by many friends and relatives who carried him off the plane, loaded him onto an ATV, took him home and carried him into his home. He continues to thrive at home, and truthfully, probably will have improved physical health due to mental stress and anguish having been eliminated.

91.0

We do not have the ability to collect these federal funds in the CDDG component, because no federal receipts are assigned there. We are anticipating a shortfall in the grants line of approximately \$90.6 in the HCB component, so we are transferring these funds to cover this shortfall. Federal collection in the HCB component should not be an issue because we have a large federal grant assigned here.

Nutrition, Transportation and Home and Community Based Care grants are being consolidated into a new component titled Senior Community Based Grants. The consolidation is being done in order to make the administration of the Title III grants and the matching GF more efficient. In FY2005 the Senior Employment program and one staff was transferred to the Department of Labor. The remaining Title III and senior grant programs are managed by the remaining two staff members. To make this more efficient rather than allocate the grants by programs, the division is looking at distributing the grants by region. Distribution by region will give the program staff more in-depth knowledge of the programs and issues in the service areas. When distributing by regions, it makes more sense if the funds are all located in one component. It will be invisible to the grantees.

Implement New Paymen Measurement Program	t Error Rate	Inc	1,047.7	396.4	60.0	484.5	15.0	91.8	0.0	0.0	5	1	0
1002 Fed Rcpts 1003 G/F Match	523.8 523.9	The State of Alas											

Improvement functions in the Office of Program Review. This expansion is necessary to comply with new federal regulations to conduct Medicaid Program and State Children's Health Insurance Program (SCHIP- a.k.a. Denali KidCare) Payment Error Rate Measurement (PERM) pursuant to 42 CFR Parts 431 and 457. This rule requires State agencies to estimate improper payments in the Medicaid Program and SCHIP program.

The Improper Payments Information Act of 2002 (Public Law 107-300) requires Federal agencies to annually review and identify those programs and activities that may be susceptible to significant erroneous payments, estimate the amount of improper payments and report those estimates to the Congress, and if necessary, submit a report on actions the agency is taking to reduce erroneous payments. The effect of this rule is that States are now to be required to produce improper payment estimates for their Medicaid and SCHIP programs and to identify existing and emerging vulnerabilities. Once identified, these vulnerabilities can be addressed by States through actions taken to reduce the rate of improper payments and produce corresponding savings at both the State and Federal levels.

The PERM program will commence on July 1, 2005 with Phase I. Beginning in October, 2005, (Phase II) the Department will be expected to review a statistically valid sample of approximately 800-1200 claims/line items from each program (Medicaid and SCHIP) per year. There will be an impact on the resources in each Division managing Medicaid Services to assist the PERM staff with access to policies, procedures and data. Division staff may be called upon to assist in the interpretation of medical records pertaining to claims associated with services that Division manages. The PERM process includes expectations for corrective actions. Divisions will need resources to implement corrective actions resulting from PERM findings.

This position adjustment adds the positions that were created to integrate the department's Information Technology section into one component. This integration will work to meet the department's mission and goals and will help streamline processes and statewide projects. This integration is being done in conjunction with the State's efforts to make efficiencies within State government.

1004 (	en Fund	76.0

To maintain grant levels consistent with FY04 and FY05 for Anchorage and Fairbanks in the HSCMG program a slight increase of \$76.0 is required to hold these two communities harmless from any reductions. This is because the individual grants to the three communities that qualify (Anchorage, Fairbanks and Mat-Su) is based on population and the pro-rated amount shifts due to slight variations in the certified population estimates. The intention is that the grant levels will not be reduced for any one grantee, thus the total amount of the program has to increase so the individual pro-rated amount for any one of the three communities is not less than the year before.

The final grant amounts per community expected in FY06 is outlined in the table below.

The allocation based on using 2003 certified populations figures and using \$239,700 as the target would be:

	2003 Cert Pop	% Alloc Award (70%) Match (30%)	Tot Proj
Cost Anchorage	274,003	64.67% 798,889 342,381	
1,141,270 Fairbanks	82,214 1	9.40% 239,700 102,729
