Additional Information / Prior Funding History:

FY2004 - \$3,000,000; FY2003 - \$2,700,000; FY2001 - \$850,000; FY2000 - \$3,500,000.

Project Description/Justification:

The existing airport has an 1800 ft. runway that does not meet current standards for length, width, or runway safety areas. The runway surface binding materials have been worn away resulting in 3 to 4 inch size rocks coming to the surface. The surface puddles during spring breakup and rainy weather. There is a high voltage line near the access road and apron. The centerline of runway 15/33 has a vertical curve and there is no line of sight between ends.
