**Additional Information / Prior Funding History:**

FY2005 - \$200,000; FY2004 - \$2,100,000.

**Project Description/Justification:**

Swan Lake is a body of water that is about 5 feet deep on average. This road would ensure a dependable source of water for the new water treatment plant and will be a major step towards upgrading the level of sanitation in the community. The town's infrastructure is currently split on either side of the lake and access is frequently blocked by flooding of the existing boardwalk during periods of high water. The present sewage lagoon near the school has sewage leaking directly into Swan Lake. This road will support water, sewer and electrical lines to be constructed by others.
