Additional Information / Prior Funding History:

None.

Project Description/Justification:

The terminal apron is congested. Apron congestion will be relieved by expanding the terminal apron southward. There are currently no available aviation lease lots at the terminal apron. This project will create additional lease lots by relocating the existing, small general aviation (GA) parking area to the east and using this space for additional lease lot development. It will also provide additional needed GA aircraft parking. This project is recommended in the Kotzebue Airport Master Plan (1998).
