

**Fairbanks International Airport: Runway 1L-19R  
Reconstruction**

**FY2006 Request: \$21,500,000  
Reference No: AMD 40293**

**AP/AL:** Allocation

**Project Type:** Construction

**Category:** Transportation

**Location:** Fairbanks Areawide

**Contact:** Kip Knudson

**House District:** Fairbanks Areawide (HD 7-11)

**Contact Phone:** (907)269-0724

**Estimated Project Dates:** 07/01/2005 - 06/30/2010

**Appropriation:** Airport Improvement Program

**Brief Summary and Statement of Need:**

Rehabilitate the primary air carrier runway 1L-19R. This will include the design and construction for replacement of the runway pavement structure, reconstruction of airfield lighting systems as necessary to accommodate pavement replacement, relocation of the airfield lighting regulator building, drainage modifications, safety area upgrades, pavement marking and pavement grooving. The scope of this work includes relocation of the transient heavy aircraft apron and modifications to Taxiway "A" which are both necessary to permit use of Taxiway "A" as a temporary runway while 1L-19R is closed for rehabilitation.

None.

**Project Description/Justification:**

A pavement management plan including a detailed pavement inspection was completed for FAI during March of 2001. This report found that the Pavement Condition Indexes (PCI's) of the pavement on Runway 1L-19R were below desirable levels. A follow up pavement inspection during 2003 found further degradation of the runway pavement surface.

To assist in selection of the best rehabilitation strategy for this critical airfield surface, an engineering firm specializing in pavement evaluation and testing was contracted to perform non-destructive testing and evaluation of the airport pavements. Structural analyses based upon mechanistic design principles, field tests, and the 20- year traffic forecast were used to develop recommendations for reconstruction strategies.

Transient heavy aircraft parking is provided on the apron south of the terminal building. Recent inspections of the pavement in this area determined that the apron has reached the end of its design life and requires rehabilitation or total reconstruction. Heavy aircraft parked on two of the four hardstands located on this apron are penetrations to the runway 1L-19R Federal Aviation Regulation (FAR) Part 77 transition surface. Obtaining federal funds to rehabilitate this apron area will be contingent upon providing a transient heavy aircraft parking area which is compliant with airport design requirements and regulations. Also, due to their proximity to Taxiway "A" these two hardstands could not be used while

---

Taxiway "A" is used as a temporary runway.

The new heavy apron site is in an un-developed area of the airport and it is anticipated that these improvements will permit the private development of underutilized land by providing access to the airside from these properties. This development will expand the revenue base for the operation of the airport.

This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
