ADN 1880375 Add Maintenance Position												
	LIT	0.0	67.7	0.0	-67.7	0.0	0.0	0.0	0.0	1	0	0
Maintenance contracts for the new Environmental Health Laboratory are expensive and provide insufficient coverage to meet the needs of this expanding operation. This transaction transfers funding, previously used for those contracts, to personal services to allow the establishment of an additional full time Maintenance Specialist Building/Facilities/Construction Journey I position, PCN 18-#033, in Anchorage.												
The Environmental Health Laboratory opened in December 2005 with one maintenance employee responsible 24/7, for the 16 million dollar state-of-the-art laboratory. Experience has shown that it is physically impossible for one person to maintain this complex facility without backup. Multiple maintenance contracts were implemented but are insufficient to adequately maintain the building, the expensive equipment and provide backup for the necessary 24/7 coverage. With this transaction, we will cancel and/or reduce contracts, using the funding to support an additional building maintenance position and create a more effective and efficient operation.

1002 Fed Rcpts		261.9										
1003 G/F Match		261.8										
<p>The Alaska Drinking Water Program is an EPA delegated primacy program, receiving a federal grant as the primary source of funding. For the past several years, grant funding has not kept pace with increasing costs required to implement the program. The program has fallen behind in adopting and implementing new federal rules. When a program falls behind, the EPA retains partial primacy and enforces the new rules until the State can catch up. Traditionally, EPA enforcement is swift, strict and does not include technical assistance - making it difficult for public drinking water systems to attain and maintain compliance. If the State does not catch up, primacy may be lost altogether.</p> <p>Funding for additional staff and resources is needed to keep pace with new requirements, adopting and implementing new rules in a timely manner. Additional federal funds requiring a 50% match are available.</p> <p>The legislature proposed a three year plan for obtaining and implementing primacy and funded the first two years to ensure that Alaska's public water systems will be regulated by the state Drinking Water Program not the EPA. This request seeks funding for the third and final year of the three year plan.</p> <p>In addition to providing needed technical support, State primacy allows:</p> <ol style="list-style-type: none"> 1. Issuance of monitoring waivers to reduce the cost of routine monitoring. EPA does not. 2. Issuance of variances or exemptions that allow public drinking water systems to achieve compliance over time while still providing public health protection. EPA does not. 3. Issuance of construction and operation approvals that reflect local knowledge, experience and an understanding of arctic engineering principles. Experience EPA does not have. 												
Increased Personal Services Costs												
	LIT	0.0	160.0	0.0	-160.0	0.0	0.0	0.0	0.0	0	0	0
Personal service costs have increased due to supervisory differentials, upgrades/flex positions, and regular merit step changes with no increased funding.

	LIT	0.0	-100.0	0.0	100.0	0.0	0.0	0.0	0.0	0	0	0
This transaction realigns excess personal services authority, authorized to cover anticipated additional PERS costs that did not materialize, to the contractual line where it is needed for increasing term contracts. The air quality division has term contract agreements for air permit program technical assistance, air non point and mobile source program transportation control program technical assistance and air non-point and mobile source program planning. Over the past two years there has been increased utilization of these contracts which has allowed the division to better manage their increasing workloads without accumulating additional staff and to assist with projects that have become backlogged due to the increasing workload.

This transfer of federal authority from the Water Quality component to the Facility Construction component is due to a reduction in the federal grants that were provided for water quality projects. Additional EPA grants became available to increase state grants to rural communities for the Remote Maintenance Worker program. The Remote Maintenance Worker program workers help the rural communities maintain the water and sewer facilities and protect the state's capital investments in these facilities. This transfer will allow the Department to increase the grants to rural communities.

The citizens of Alaska adopted Ballot Measure 2 during the fall of 2006. The new statutes require implementation of an Ocean Ranger Program - marine engineers licensed by the U.S. Coast Guard to serve as independent observers on board large cruise ships to monitor compliance with state and federal requirements for marine discharge and pollution and to ensure that passengers, crew and residents at port are protected from improper sanitation and health and safety practices. The statute also includes a citizen's suit provision whereby citizens can bring suit against the cruise ship companies and against the Department for failure to implement the new law.

<p>During the 2007 cruise ship season, the Department implemented a transitional program that included development of initial inspection protocols and checklists; analysis of training needs and initial development of an Ocean Ranger training program; and an on-board presence by environmental professionals and marine engineers on portions of 114 voyages. All 27 cruise ships regularly operating in Alaska waters were boarded at least once.</p> <p>During the 2008 cruise ship season, the Department proposes to increase vessel oversight by Ocean Rangers to the fullest extent funded by Ballot Measure 2. Ballot Measure 2 included a new \$4/berth fee to support the Ocean Ranger Program. The Department estimates that this fee will collect approximately \$3.8 million/year which is deposited into the Commercial Passenger Vessel Environmental Compliance Fund (CPVECF). The Department's base budget from the CPVECF for the Ocean Ranger program (beginning in FY 08) is \$1.2 million. In addition to the base budget of \$1.2 million, the Department is requesting a \$2.6 million increment in FY 09 from the CPVECF for a total annual appropriation of \$3.8 million - the equivalent of projected annual fee receipts.</p>

Over the past six years, the Village Safe Water (VSW) Program has received over \$477.9 million in state and federal capital funding, which represents the highest sustained level of funding ever administered by the program and a 30% increase over the previous six year period. As a result, the number of rural sanitation planning, design and construction projects has increased significantly. During the same time, the number of VSW Program staff has remained constant. At this point, there are over 60 projects throughout the state with funding amounts ranging from \$500,000 to \$4 million awaiting the time and

attention of Engineers and Grant Administrators. Although project design and construction management is contracted out, every capital project requires oversight in order to assure compliance with state and federal requirements. Infrastructure improvements throughout the state could be further accelerated with additional VSW staff. The new positions would mitigate project backlogs which are being scrutinized by federal funding agencies and which could jeopardize future federal funding assistance.

We are requesting the following 3 new positions:

- 2 VSW Eng I (Job Class P8662, PCN 18-#038 and 18-#039)
- 1 Grants Administrator II (Job Class P2270, PCN 18-#040)

The above positions will be located in Anchorage. The funding source for these positions will be CIP. A change in the method of charging direct project costs has left uncollectible CIP authorization available in this component. This CIP authorization will be used to fund these positions, no additional funding is being requested.
