Detailed Project Description and Justification:

FNSB Infrastructure – Road Service Area Funding
 State Funding Request \$10,000,000

The FNSB has 477.45 miles of roads that are maintained by local residents through voter approved service areas and mill rates. Many of these roads were created and extended well in advance of establishment of current road standards. Frequently these roads follow older trails and drives constructed by early residents, and the quality of the roads reflect that history.

The FNSB, with the assistance of local, state, and federal funding, has undertaken an upgrade program to improve the safety, quality, and drivability of service area roads within the community. A project inventory, initiated by local service area commissioners and compiled by FNSB rural services staff, identifies the areas of need. This inventory contains 332 projects totaling \$86 million. Prioritization of these projects is done by a Road Service Area Council and construction is managed by FNSB engineering staff.

These projects include a number of small, poorly maintained bridges, culverts, and low lying roads that often flood or are severely damaged during high water events. Residents can be cut off from access to the roadway system for days; emergency crews are unable to reach homes and businesses creating tense moments when life or property is endangered.

Funding for approximately 20% of this list is currently in hand. The requested funding allows for another 25-30 projects to

2010 Service Area Road Project Grant Distribution

Eligibility and Scoring Matrix

1. Project grant funding is limited to a maximum of \$500,000. The maximum grant is \$450,000 with a 10% service area match of \$50,000.
2. The project cost must be greater than \$20,000 to be eligible for a grant.
3. Service areas may receive only one project grant.
4. Service areas that receive a direct state appropriation for a project will not be eligible for a Borough grant in the same year.
6. Service area project priority was added in 2010 as a scoring criterion.

Project and Alternate Project Selection

Of the eligible projects submitted, the seven top scoring projects were selected for project grants in 2010 based on utilizing approximately \$2,000,000 in grant funds and the capacity of the Public Works Department to staff the projects. As funding for additional grants becomes available, grants will be offered to service areas for the alternate projects in the order that they are ranked.

A system for breaking ties between projects on the list of alternates was adopted by the Assemble Road Service Area Committee at its December 15, 2009 meeting.
