Alaska Fire Chiefs Association, Inc. - Alaska Marine Firefighter Training for Land-Based Firefighters

State Funding Requested: \$150,000**House District: Statewide (1-40)**

One-Time Need

Brief Project Description:

Project would train land-based firefighters in Alaska the techniques and procedures required to safely and effectively respond to marine fire emergencies.

Funding Plan:**Total Cost of Project: \$150,000***There is no other funding needed***Detailed Project Description and Justification:**

This project would train land-based firefighters in Alaska the techniques and procedures required to safely and effectively respond to marine fire emergencies. There does not currently exist in Alaska a training program to deliver this vital training for land-based firefighters. The project would develop the training curriculum based on National Fire Protection Association Standards and deliver the training to firefighters from maritime communities across the State. The training would be delivered in a format where the course participants would travel for a two day seminar and be given training and course assignments specific to their communities. The participants would return home and complete their assignments and return for a 5 day intensive training program that would prepare the firefighters to safely and effectively respond to marine fires. The grant would be used for the course development, travel for 30 students to attend the course, instructor fees, administrative costs, and course materials.

Project Timeline:

Once funding is received a contract will be issued for the course curriculum development. Scheduled deliver of the course will occur March-April 2011.

Entity Responsible for the Ongoing Operation and Maintenance of this Project:

The Alaska Fire Chiefs Association
