Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:

This is the initial state funding for the Denali Commission.

Project Description/Justification:

The Denali Commission was created ten years ago as a federal-state partnership to address clean up and replacement of bulk fuel storage tanks in rural Alaska that were not in compliance with the U.S. Coast Guard requirements. In partnership with the Alaska Energy Authority (AEA), federal and state funds have been used to address a substantial backlog of bulk fuel projects as well as rural power system upgrades. Over the years, additional funding has been made available through federal earmarks for energy, health facilities, job training, and rural transportation projects. At the same time, the State of Alaska has provided significant investments in these program areas.

With changes at the federal level regarding earmarks and support from Washington DC for commission programs, it is important for the state to demonstrate its commitment to the Denali Commission through a partnership grant. This will provide flexibility in additional funding for energy, health facilities, job training, and rural transportation projects. These funds are in addition to the \$10 million allocated to match AEA Energy Projects and funding under the Alaska Housing Finance Corporation.
