1004 Gen Fund		37.8										
Pursuant to CH12 SLA09 Sec17 P73 L25 through P76 L20, \$15 million is distributed in August to State agencies from the Office of the Governor to offset the increased costs for fuel and utilities. Per the Department of Revenue (DOR), the fiscal year-to-date average price of Alaska North Slope crude as of August 1, 2008, was \$64.53 per barrel, which is \$6.24 (10.7%) above DOR's Spring 2009 FY2010 forecast amount of \$58.29.												
The amounts transferred to state agencies are as follows: Administration, \$22.8; Corrections, \$600.0; DEED, \$57.2; DEC, \$37.8; Fish and Game, \$77.7; HSS, \$600.0; Labor, \$35.3; DMVA, \$327.3; DNR, 68.0; DPS, \$273.9; Transportation, \$11,250.0; University, \$1,650.0.

The Environmental Health Laboratory provides a variety of testing on environmental, animal, food, and water sources. Contracts to maintain equipment calibration cost \$260.0 more than allocated funds. The equipment must be calibrated annually to provide accurate results and maintain federal certification and licensing.

If these items break down without a maintenance contract in place the entire facility will be shutdown and testing will cease. Industries that rely on this testing will be unable to sell their products because private laboratories are not certified to do these tests. Therefore, essential public health monitoring for animal diseases will end.

The public's health and the State's reputation of protecting its citizens will be put in danger with the shutdown of laboratory services.

Receipt Supported Services authority is needed to contract out with specialists in the area of toxicology, fate and transport and drift prevention to more thoroughly evaluate all the issues raised by the public when evaluating pesticide spray proposals. The revenue is currently available and generated by pesticide manufacturers outside of Alaska who pay a yearly registration fee so their products can be sold in Alaska.

<b>ADN 1800400 Transfer Personal Services to Contractual</b>												
LIT		0.0	-200.0	0.0	200.0	0.0	0.0	0.0	0.0	0	0	0
A \$200.0 line item transfer from Personal Services to Contractual is requested for the Air Quality Component. The Division of Air Quality contracts out a large portion of its permitting work, resulting in lower personal service expenses. This line item transfer will realign authorization with planned expenses.												
<b>Subtotal</b>		<b>9,264.4</b>	<b>5,547.4</b>	<b>237.2</b>	<b>3,207.6</b>	<b>217.2</b>	<b>55.0</b>	<b>0.0</b>	<b>0.0</b>	<b>60</b>	<b>0</b>	<b>0</b>

1004 Gen Fund		150.0										
Outer Continental Shelf (OCS) federal permitting requires the Environmental Protection Agency (EPA) and industry to be consistent with the state implementation of the permit program, which requires coordination and consultation between EPA, DEC and industry. This investment will allow the Department to work with EPA in processing up to 3 unique and complex OCS air quality permits anticipated to be submitted over the course of this coming year. Without DEC participation, and the funding to allow more consistent assistance without pulling away from current permitting requirements, DEC believes it will slow industry's OCS permit approval process with EPA, having an impact on economic growth.												
Climate change is adversely impacting Alaska, and some form of regulation of greenhouse gas emissions is imminent. Climate change legislation is moving through Congress and EPA is initiating and finalizing rules related to climate change activities under the Clean Air Act. This increase will provide essential capacity so that the state may comply with these requirements.												
<b>Transfer Authority to the Grants Line for the Diesel Emissions Reduction Act (DERA) Program</b>												
LIT		0.0	0.0	0.0	-100.0	0.0	0.0	100.0	0.0	0	0	0
Transfer of authority from the contractual line to the grants line per AS 46.14.535 for the Diesel Emissions Reduction Act (DERA) program.

PosAdj		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	0
<p>This Environmental Engineering Associate II position will assist in the management of the large and complex Ocean Ranger program. The Ocean Ranger Program is unique to the State of Alaska. Ocean Rangers act as independent observers to monitor cruise ships' compliance with environmental, health, and safety requirements. However, Ocean Rangers are not authorized to perform any compliance or enforcement work.</p> <p>The incumbent will help develop training standards and answer detailed engineering and marine engineering questions that arise from the 30+ Ocean Rangers who ride aboard large cruise ships in Alaska. The incumbent will also serve as the technical lead in reviewing over 2,100 inspection reports that the Ocean Rangers produce each season and may direct the Ocean Rangers to gather specific additional information to determine what, if any, enforcement action is necessary. Approximately 16% (&gt;300) of the inspection reports that Ocean Rangers produce identify potential compliance items that this position would investigate. The incumbent will be the lead in developing or working with a contractor to develop a new training program to provide more Alaskans with the skills necessary to become an Ocean Ranger as amended in SB 183.</p>

<b>Federal Resources for Public Water Systems Operator Certification and Training</b>												
1002 Fed Rcpts	Inc	240.0	87.0	0.0	150.0	3.0	0.0	0.0	0.0	1	0	0
		240.0										
<p>To protect public health, Department regulations (18 AAC 74) require that public drinking water systems have operators trained and certified at a level commensurate with the complexity of the of the system. There are over 640 systems subject to these regulations. Approximately 240 systems (38%) are out of compliance with the operator certification requirements. Those 240 systems are under the control of individuals who may not be properly trained and lacks the proper certification. This situation is more common in the small systems, where operator turnover is high. Untrained or poorly trained operators in control of public water supply systems represent a significant threat to public health. The proposed increment will provide staff resources as well as contractual support to provide training and certifications of the remaining small system operators.</p>												
<b>Federal Resources for Remote Maintenance Worker Program</b>

<p>Funding is requested to match additional federal resources available to the Remote Maintenance Worker program to maintain their ability to deliver operations and maintenance support services to rural communities in order to prevent catastrophic failures and help sustain water and wastewater infrastructure.</p> <p>In FY09, 68.7% of regulated systems were in compliance with water supply system operator certification requirements, an increase of 10% since FY06. In order to provide operations and maintenance support and emergency response services to public water and sewer systems, grant funds are distributed to seven regional health corporations who, in turn, provide Remote Maintenance Workers (RMW) to perform these services. This program is heavily reliant on travel, which has seen dramatic cost increases over the past two years. It has been demonstrated that the routine and regular on-site presence of the RMWs prevents catastrophic failures and helps sustain the water and wastewater infrastructure in rural Alaska. The assistance provided by RMWs increases the exam success rate among rural operators which improves compliance with the operator certification requirements, this in turn increases protection of human health.</p>
