Additional Information / Prior Funding History:

This project will award alternates established in bid documents associated with a currently funded renovation project. Funds are not sufficient in the current project to complete renovation as designed at the 41,000 square foot Metlakatla High School built in 1968. This project will fund renovation of the gym and locker room area, replace the dust collection system in the wood shop, replace and add student walk paths, improve the school's entry area, and install a new double wall fuel storage tank.
