Additional Information / Prior Funding History:

FY2010 \$300,000 AHFC Dividend

Project Description/Justification:

The purpose of this project is to upgrade existing security and door access systems to senior/disabled and multi-family public housing complexes.

The projected outcome is to:

- Increase security for residents;
- Reduce theft and vandalism;
- Reduce maintenance and custodial costs; and,
- Increase useful life of the structures.

Security and Main Entry Door Access Systems utilizes Corporate (AHFC) funds to be used to upgrade existing security and door access systems to senior/disabled and multi-family public housing. The project includes replacement of security and door access systems that are outdated and are no longer supported by manufacturers for replacement parts and software.

This request will provide funding to continue the upgrades for security and main entry door access systems for AHFC senior/disabled and low-income multi-family housing.

AHFC Security Systems Replacement/Upgrades

FY2011 Request: \$500,000
Reference No: 47068

A recent comprehensive survey was conducted to identify the location, configuration and current condition of door access and security systems in senior/disabled and low-income multi-family housing in Anchorage, Fairbanks and Juneau.

Many of the systems were found to be outdated with analog-type cameras, recorders, card readers and software components that are no longer supported by the various manufacturers of systems compatible with currently available equipment.

Systems have already been upgraded and standardized in the Anchorage area and funding was received in FY2010 that is being used to address issues identified at three senior housing complexes in Fairbanks. This funding is intended to upgrade and standardize systems for Juneau and the balance of work needed to complete the systems in the Fairbanks area to use the same digital technology already in place in the Anchorage properties. Standardization will consolidate purchasing and maintenance of system components.
