Project Description/Justification:

The Department of Transportation and Public Facilities is responsible for administering the federal airport and highway construction programs. As required by Title 23, USC, the State Department of Transportation must be "suitably equipped and organized" to assume the duties as required by the federal highway program. Office of Management and Budget (OMB) Circular A-87 does not allow the state to charge equipment purchases directly to construction projects. The costs to support and administer the federal construction program must therefore be borne through the Department's Indirect Cost Allocation Plan.
