Location Nunaka Valley Elementary School

Project Title: Purchase and install Interactive Display Technology

Amount of Funding Requested \$75,000.00

Total Funding to complete project \$75,000.00

Primary House District: 19 **Secondary House District(s):** 21, 22

Primary Senate District: J **Secondary Senate District(s):** K

Project Description **Principal's Priority** 1

Our school currently has five mounted interactive display technology in place for interactive learning. This leaves seven classrooms without access to this powerful resource. Our plan would create equal access to this technology for all students. To implement this plan we would need to purchase interactive display technology for seven classrooms.

We will also need to design a collaborative in-building mentor model. (partnering current users of this technology with new users).

Benefits if Project is Funded

If completed, this project will allow all students equal access to a learning tool that raises levels of engagement and greater understanding. interactive display technology increase student motivation and allow for the multi-sensory learning needs of a wide variety of learners. The learning styles of all students, especially those with special needs, are addressed when lesson delivery incorporates the use of an interactive whiteboard.

Impacts if Project is not Funded

If not completed, students at Nunaka Valley will have access to this powerful learning tool in kindergarten and first grade and then not again until fifth grade. Having had the opportunity to have a small number of Smartboards in our building has shown users and non-users alike the obvious impact on student engagement. We are at a point where our small pool of current users will be able to act as mentors to our new users.
