**Additional Information / Prior Funding History:**

See Army Guard Facilities Projects.

**Project Description/Justification:**

The current Organizational Maintenance Shop (OMS) no longer meets the mission requirements and is not large enough to accommodate the number of vehicles and workers assigned to the Unit. This is a design-build project that expands the size of the facility by a minimum of one bay to support for the fielding of new vehicles and personnel in the Fairbanks area. The project will also upgrade the current heating and ventilation systems to meet current codes and standards and explore more energy efficient lighting and insulation. Priorities and cost estimates may need to be changed to accommodate emergency projects not listed, actual project costs, and other considerations.
