

Annual Facilities Maintenance and Repairs

FY2012 Request: \$1,000,000

Reference No: 45637

AP/AL: Appropriation

Project Type: Renovation and Remodeling

Category: Public Protection

Location: Statewide

House District: Statewide (HD 1-40)

Impact House District: Statewide (HD 1-40)

Contact: Leslie Houston

Estimated Project Dates: 07/01/2011 - 06/30/2016

Contact Phone: (907)465-3339

Brief Summary and Statement of Need:

This project will provide funding for essential renewal, replacement, renovation, remodeling and repair of electrical, mechanical, roofing, walls, fire and life safety, security, structural, food service, pavement and site drainage systems at all correctional facilities. This work is required to enable continued safe, secure and efficient operation of the 24-hour incarceration facility. This project assists in providing secure confinement, and keeping the community safe from offenders placed in the department's custody.

Project Description/Justification:

The Department of Corrections is responsible for maintaining 117 state-owned buildings (over 1.3 million square feet and \$529.1 million in replacement value). The majority of these buildings are over 28 years old, with 20% exceeding 30 years and 17% exceeding 43 years of age. This appropriation will fund the most urgent fire and life safety, environmental, utility infrastructure, security and operational requirements in the department.

This project is a statewide compilation of essential capital requirements at all institutions, primarily deferred maintenance requirements. A list of known requirements is formulated in late October or early November each year. The list is a "snapshot" of the various needs at that time. The actual list of projects is fluid between the time that the list is prepared and the time the appropriation is authorized.

During this time period, other critical requirements are identified with several of the identified projects already accomplished. Funds are then allocated to the most urgent of the remaining requirements. The projects that could not be funded become the basis of the next fiscal year capital appropriation request. Past experience shows that the vast majority of available funding will be allocated to deferred maintenance projects that were identified in the Department's FY2009 capital request.

Electrical and emergency generator systems, monitoring systems, central control room security controls, and intercom systems at most of the institutions are in immediate need of renewal or replacement to enable continued security support. Boilers, Heating Ventilation and Air Conditioning Systems, fuel tanks and fuel distribution systems need a major repair effort to enable them to meet their function.

Roofs, exterior walls, interior walls, floors, and ceilings in most institutions need repairs to continue providing safety and security. These roofs and walls can no longer be maintained with normal in-house techniques. They need major repair or replacement so that they do not jeopardize the security systems and safe functioning of the facilities. Deferral will cause further damage to the building structures and will increase the ultimate repair costs. Funding to address the total roof repair needs will continue to be requested in future Department of Corrections capital requests.

As repair projects are identified, they are initially added to Corrections' Annual Facilities Maintenance and Repairs list, in priority order. Sometimes a facility situation may continue to deteriorate to the point of becoming a threat to health, safety or security, but remain unfunded. At that time it is transferred to the Deferred Maintenance listing, where all projects are of higher departmental priority for funding than the Annual Facilities Maintenance and Repairs list.
