Brief Summary and Statement of Need:

Annette Island District Phone System Replacement is #6 on the December 17, 2010 CIP Major Maintenance list. This project will reimburse the school district for the costs associated with replacement of the antiquated district phone system. The old system exceeded its ability to provide adequate communications and separate, outside lines were necessary to serve all portions of the school. The new district-wide system utilizes voice over IP technology. Installation included 2 underground conduits for copper and fiber cable. The system provides service to all three buildings in the high school complex; including fax, alarm and control services.
