**Additional Information / Prior Funding History:**

\$7.5 million in SLA 10, Ch. 43

**Project Description/Justification:**

This funding is a second component of federal funds for the State of Alaska to help mitigate impacts of a 15% reduction in Chinook harvest levels in Southeast Alaska under the revised 2008 Pacific Salmon Treaty Agreement. Utilizing recommendations from affected stakeholders, the \$7.5 million of federal funding received in FY11 is currently being allocated for salmon stock enhancement projects; grants for infrastructure improvements; direct payments to commercial trollers; and consumer research. Funding received in FY12 will again be allocated to project areas developed in consultation with affected stakeholders.

The department is administering the Chinook mitigation program for the state, but is only retaining funds for overall programmatic administrative costs and for funding of salmon enhancement projects. Other program component funding will continue to be distributed through processes of the Department of Commerce, Community, and Economic Development and/or other appropriate entities.
