

Prince of Wales Island: Klawock to Hollis Pavement Rehabilitation and Culvert Replacement

FY2012 Request: \$20,000,000
Reference No: AMD 51536

AP/AL: Allocation

Project Type: Construction

Category: Transportation

Location: Prince of Wales Island

House District: Cordova/Southeast Islands (HD 5)

Impact House District: Unidentified House District

Contact: Pat Kemp, Deputy Commissioner

Estimated Project Dates: 07/01/2011 - 06/30/2018

Contact Phone: (907)465-3900

Appropriation: Surface Transportation Program

Brief Summary and Statement of Need:

This is a new capital request because of a STIP amendment that occurred after the December 15 release of the Governor's FY2012 budget. This project aims to resurface highway pavement between Klawock and the Hollis Ferry Terminal, including paving the parking and staging areas of the ferry and seaplane terminal. Reconstruct sections of failing sub-base where large settlements are occurring. Replace deteriorated culverts along the length of the Klawock Hollis Highway and mitigate perched pipe culverts for a number of anadromous fish streams. Also, recondition ditch, replace signs, and improve guard rail.

Additional Information / Prior Funding History:

None.

Project Description/Justification:

The existing road has segments of significant pavement failure. The project would extend the life of the road and address safety issues associated with poor pavement and guardrail conditions. In addition, the need to replace fish culverts as soon as possible is needed to restore fish access to the upper reaches of a number of streams above the highway within the Klawock Watershed. Drainage issues will be addressed with this project and surface improvements will be made to the ferry terminal and seaplane facility lot.
