Project Description/Justification:

The objective of this program is to increase the amount of revenue available for highway programs by increasing motor fuel tax compliance. The scope is to implement automated tests to analyze and compare tax returns filed; contact taxpayers to resolve potential compliance issues; perform analysis and audits as required to confirm taxpayer information on both interstate and international fuel imports. For the coming fiscal year, additional refund claim audits will be performed and increased compliance work will be accomplished through data-matching of imported fuel with reports from the Homeland Security Administration.

In FFY2010 this program resulted in the collection of an additional \$28,295 in taxes, \$14,234 in penalties, and the denial of \$115,397 in claimed refunds for a total of \$157,926. In FFY2009, this program resulted in \$298,277 of additional revenue.
