

Statewide - Air Quality Mobile Source Modeling

FY2012 Request: \$1,200,000

Reference No: 51865

AP/AL: Allocation

Project Type: Research / Studies / Planning

Category: Transportation

Location: Statewide

House District: Statewide (HD 1-40)

Impact House District: Statewide (HD 1-40)

Contact: Pat Kemp

Estimated Project Dates: 07/01/2011 - 06/30/2018

Contact Phone: (907)465-3900

Appropriation: Surface Transportation Program

Brief Summary and Statement of Need:

This is a new capital request because of a STIP amendment that occurred after the December 15 release of the Governor's FY2012 budget. This project will develop a statewide framework for Motor Vehicle Emissions Simulator (MOVES) modeling in Alaska that ensures consistent development, application, and approval of modeling workflows (e.g., input data collection and processing, model setup and execution requirements, post-processing of outputs, etc.) in all regional mobile source inventory applications envisioned within the state.

Additional Information / Prior Funding History:

None.

Project Description/Justification:

These regional applications include State Implementation Plan (SIP) emissions/emission budgets and transportation conformity emission inventories, NEI (National Emission Inventory) submittals to EPA that consist of both planning and episodic modeling inventories, throughout the state.

In developing and implementing this centralized approach, the project will define appropriate workflows for each type of regional application that address the following:

- The availability and types of data needed (e.g., DMV registrations);
- The level of pre-processing required to generate model-ready inputs;
- Appropriateness of MOVES default data (e.g., fuel formulations) for Alaska;
- EPA guidance-based model execution protocols (e.g., hourly time spans for SIPs);
- Mechanisms for validating model outputs; and
- Use and applicability of Alaska-specific output post-processing adjustments.

Project will provide the state with a system for ensuring consistent emission estimates to be
